PIONEER GOLD COINAGE - REVISITED -

by Donald H. Kagin

It hardly seems like a decade has passed since I last wrote an article on my favorite series for *CDN*, but here we are with a resounding affirmation of the axiom, "the more things change, the more they stay the same." In 1983, we suggested that a representative 11-piece type set of high quality Pioneer or Private ("*Territorial*" being a misnomer since none of these coins were struck in a Territory when issued) gold coins could be easily assembled for around \$50,000; 11 years later, *you still can do it!*

Of course, there have been some developments (mostly positive) in the last 11 years:

- the emergence and acceptance of slabbing coins (including Pioneer gold), with more accurate population figures resulting;
- two *bull* markets (or bear market rallies?), in 1986 and 1989-90;
- the sale (*three* times), and ultimate disbursement, of the Kagin-Clifford collection—the largest and finest collection of Pioneer coins ever assembled;
- the discovery of the shipwrecked *S.S. Central America* hoard of gold ingots, coins and Pioneer gold.

CERTIFICATION

Of these developments, slabbing has to be considered the major positive event of the decade. Due to the specialized knowledge required, few dealers handled Pioneer coins prior to both PCGS and NGC independently certifying them. Now, far more dealers are at least willing to broker, if not stock, these pieces. Realistically, however, because of the scarcity of this series, and until there are available pricing sheets, these coins will not be part of most dealers' inventories. This is unfortunate; despite their fascinating, historical nature and interesting designs, this series remains relatively inexpensive. Some types are almost as cheap as they were 20 years ago! Additionally, their ease of acquisition from specialists and slabbing have made Pioneer gold more available than ever.

TEN YEAR PRICE HISTORY

During the last decade:

- Prices have matured; except during 1989-90, values for most pieces have fluctuated within 10% one way or the other;
- Pioneer coins have become even more *undervalued*, relative to comparable gold rarities. For example, in 1983 the 11-piece Pioneer gold type set (described below) cost approximately the same as an MS65 U.S. 12-piece gold type set; today, the latter would cost 60% more.
- In spite of certification (slabbing), overall demand has remained static.
- The specialized areas of the Bechtlers and the Mormons, coupled with the discovery of new varieties, have shown moderate increases in demand and values.

THE *S.S. CENTRAL AMERICA* DISCOVERY

In 1989, a research vessel, using the latest technology and an undersea robot, discovered the wreck of the 19th century steamer, the *S.S. Central America*. Still intact was an estimated \$10 billion worth of gold bullion, \$20 gold pieces and a small hoard of Pioneer gold. Ever since the discovery was made public, the fate of the treasure has been in litigation, with insurance companies and other outside interests fighting for their share. Despite recent articles to the contrary, we have it on very good authority that yet another appeal of recent court rulings is probable before February 1994. The final resolution may be a year or two away. The most likely scenario places the sale of the coins at least 2-3 years in the future, yet the presumed "overhang" has erroneously had a depressing effect on the entire Pioneer gold market for the last 4 years. Contrary to this conventional 'wisdom', we believe that the sale of the coins will cause prices to *rise*.

Consider the following. In his 1990 article for the *Numismatist*, Walter Breen reported that, up to that time, the contents of the *S.S. Central America's* Pioneer gold "hoard" consisted of:

- a dozen or so \$50 gold pieces total; only one of which—an 1851 .880—is uncirculated;
- several 1853 U.S. Assay Office \$10 including the .884 variety;
- one Humbert \$10 1852;
- three Wass, Molitor & Co. \$10 1852 Head of 1855;
- one Wass, Molitor & Co. \$50, VF35-XF40;
- one or two Wass, Molitor & Co. \$10 1852 "wide date";
- one counter, marked "W.W.Light/DENTIST";
- one Wass, Molitor & Co. \$10 1855, perhaps the finest known;
- two Baldwin & Co. 1851 \$10, VF or so.

Now here's what it did **NOT** contain (up to that time):

- no more than 100 coins in all;
- no rare 1849 or 1850 issues like a Pacific & Co., Dunbar & Co., Cincinnati, etc.;
- no Mormon, Oregon or Colorado pieces;
- no new types or varieties;
- except for two scarce Wass, Molitor varieties, this discovery will not impact any previously established rarity ratings.

As of this writing, we understand that there will be at least one additional season of excavation of the *S.S. Central America*. So far, however, there have been no reports of substantial new Pioneer gold finds. **On the other hand, there are more than 6,000 ounces in gold ingots from five major Gold Rush assayers including one weighing almost 63 pounds!** The sale of these ingots will certainly create a sensation *far beyond the numismatic community*. Instead of prices dropping with the sale of these coins, we anticipate a significant *increase* in values.

When the Beck hoard of \$50 slugs was sold in 1975 and 1976, the excitement created by the sale actually increased interest and demand, and prices rose some 30-40%. Likewise, when the immense accumulation of Redfield silver dollars was dispersed in 1976, the new demand generated pushed prices higher than ever before. Clearly, international coverage of the sale, coupled with the historical significance of these coins *and the sheer immense value of the total treasure*, will significantly increase interest, demand, and values for all Pioneer coins.

THE 11-PIECE PRIVATE/PIONEER GOLD TYPE SET

August Bechtler (1842) 27G 21C.K24 AU-50

Approximate Price: \$1,200

This is the most common type of private gold coin from our nation's first gold rush (from the Southern Appalachian area). A. Bechtlers are only an R3 and often come in high quality.

A. Humbert (1881) \$50, R.E. .887, K6 VF-30

Approximate Price: \$6,000

Not only does the most common and popular "slug" belong in the 11-piece type set, but it also should be in a regular type set of U.S. gold coins, since these pieces were issued under the auspices of the United States Government and accepted as legal tender. Although one of the more expensive coins in this 11-piece type set, the slug is among the more easily obtainable types.

U.S. Assay Office of Gold (1853) \$20, .900, K18 AU50

Approximate Price: \$3,500

This is the most commonly seen private gold coin in relatively high grade of the United States Assay Office. Nice uncirculated specimens are occasionally available and should be sought by those who wish to own a very high grade type set. AU's are frequently on the market and one of the easiest pieces to be acquired.

Baldwin & Co. (1850) \$5, K1 VF-30

Approximate Price: \$4,750

Although available for less than the \$50 slug, these pieces are far rarer. Because of their diminished popularity vis-a-vis the slug, however, the Baldwin coinage has lagged behind in value. Probably because of a combination of its lack of notoriety and similarity to the Liberty Head design which appears on U.S. and so many other private gold coin types—and due

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter

P.O. Box 7939 • Torrance, California 90504

to the fact that they are not often available—few collectors have sought it as part of a type set, making them very underrated.

Kellogg & Co. (1854) \$20, K1-2 AU-50

Approximate Price: \$3,500

The Kellogg piece is popular because of its size, the relative familiarity with the name, and its availability. In addition, high quality specimens can often be found in AU-50 and make excellent additions to type sets.

Moffat & Co. (1849) \$5, K4 AU-50

Approximate Price: \$3,000

By far the most prolific coiner of the California Gold Rush was Moffat & Co. Although "common" among private gold issues, Moffat \$5s are far rarer than the regularly issued Liberty "no motto" types. Yet, one can obtain a low grade Moffat & Co. piece for very little more money than the "no motto" \$5.

Norris, Gregg & Norris (1849) \$5, K1-4 AU-50

Approximate Price: \$7,000

This is the first California private gold coin, having been issued in May, 1849 in Benicia, California. A scarce, although not rare type, the NGN pieces are in strong demand. The price reflects not just the higher grade that I strongly recommend, but also its great popularity as the first private gold coinage of California.

Wass, Molitor & Co. (1852) \$5, K1-2 EF-40

Approximate Price: \$4,500

Certainly among the least popular of all private gold pieces, the Wass, Molitor & Co. pieces have been unfairly maligned for decades. This is mainly due to the relatively poor condition in which these coins are available. In addition, most specimens come poorly struck or with dished dies, thus creating as much as a ten point swing between the grades of the obverse and reverse. This type is also one of those "monotonous" Liberty Head types of private gold coins.

Oregon Exchange Co. (1849) \$5, K1 VF20

Approximate Price: \$8,500

This is the only reasonably available type from Oregon and, therefore, must be in any type set of Pioneer gold coinage. It is, however, one of the stoppers of the set and certainly the most expensive in the relatively higher grade of VF20. However, just about any example above VG would be acceptable. The popular motif of the beaver on the log adds to the appeal of this type.

Mormon Gold/Deseret Assay Office (1849) \$5, K2 VF-35

Approximate Price: \$4,500

Mormon gold is undoubtedly the most popular of all private gold series. Not only does it have strong appeal among present-day Mormons and Utah residents, but the designs themselves are interesting and unique.

Clark, Gruber & Co. (1860), \$5, K6 EF45

Approximate Price: \$2,000

This piece and its \$2-1/2 sister are the more common Clark, Gruber & Co. specimens. This company was by far the most prolific of any coiners of the Colorado gold rush. Luckily, like the Bechtlers, Clark, Gruber & Co. issued a substantial amount of specimens so that today we can purchase a fairly high quality example with relative ease.

THE 18-PIECE PRIVATE/PIONEER GOLD TYPE SET

The following are appropriate for an expanded type set of private gold coins:

Christopher Bechtler (1831-1842) \$5, 134G 21C K20 or 128G 22C K23 AU50

Approximate Price: \$4,250

The Christopher Bechtler series pieces should definitely be considered a separate type. Several varieties exist; the two most common are described

here. High grade examples are not too difficult to locate at major coin shows and auction sales.

Augustus Humbert (1851) \$50, L.E., .880 no "50" on reverse, K2 EF40

Approximate Price: \$11,000

The lettered edge types were the first series of gold slugs and are much rarer than the reeded edge types. In spite of their scarcity, they are relatively easy to locate. Again because of the popularity of slugs, they command relatively high prices, although I consider the letter edge types considerably undervalued due to their rarity. Interestingly enough, while lettered edge types are much rarer, they often come in higher grade than the reeded edge types.

United States Assay Office of Gold (1853) \$20, "Moffat & Co." on coronet, K19 EF45

Approximate Price: \$4,000

These pieces were officially minted under the auspices of the U.S. Assay Office, but are often considered Moffat & Co. coins, whose name the Assay Office was entitled to use as set out in their contract with Moffat & Co. An interesting and popular type, this piece is scarce but often comes in high grade.

Miners Bank (1849) \$10, K1 AU50

Approximate Price: \$14,000

This is definitely a major type coin. Because only a handful surface in any given year, I did not include it under the short 11-piece type set. Miners Bank pieces interestingly are commoner above EF, than below it.

Wass, Molitor & Co. (1855) \$50, K9 F-VF

Approximate Price: \$12,500

This is a type coin because it is the only round slug made for circulation. Although much rarer than the more common octagonal slugs, like the latter, they are occasionally available at major coin shows and auctions. A clean, Fine/Very Fine specimen is considered a high quality piece and is deserving of a place in an expanded type set of private gold coinage.

Mormon "Lion & Beehive" (1860) \$5, K6 AU50

Approximate Price: \$15,000

The "Lion & Beehive" is the most desirable of the very popular Mormon series. This is probably due to its attractive motifs of a reclining lion, the first use of the Deseret alphabet depicted on the obverse, and a beehive and eagle on the reverse. These pieces are most likely a high R5 (50-75 known) and do become available from time to time. Its relatively high value is attributed to the fact that they usually are offered in high condition and are very popular.

Clark, Gruber & Co. (1860) \$10, "Pikes Peak" K3 EF40

Approximate Price: \$6,500

The most popular specimen of the Colorado gold rush era because of its depiction of Pikes Peak on the obverse (rather than the Liberty type as on most other issues.)

CONCLUSION

While prices overall have slightly declined in the last decade, supply and rarity have remained steady. Rather than experiencing the volatile roller coaster prices of gold and silver type coins, private gold coins for the most part have traded within 10% or so of their previous values. When compared to gold type coins, Pioneer gold is significantly undervalued and quite affordable, and needs only a slight upsurge in demand to appreciate in value. The advent of slabbing and publicity surrounding the eventual sale of the S.S. Central America treasure will very likely provide the demand needed to spur this most fascinating and historical series to more realistic levels.

IMPERIAL BANK

California's Business BankSM

Member FDIC

Precious Metals Division

The Stability of a *Bank* and the Responsiveness of a *Dealer*

That's what the Precious Metals Division of Imperial Bank offers to you. We stand ready to serve your needs with the physical supply of platinum, gold, and silver in both coin and bullion form, as well as various hedging strategies. As we deal strictly on a wholesale basis only, we won't be competing for YOUR clients. So when you're looking for a dealer that knows the business and an institution you can trust, look no further than Imperial Bank.

- ❖ Full-service Market-Maker in Platinum, Gold, & Silver
- ❖ Coins-Bullion-Grain
- ❖ Consignments/Leases to Dealers & Manufacturers
- ❖ Repurchase/Vaulting Agreements
- ❖ Wholesale Only
- ❖ Over \$3 Billion in Assets

1993 Review: A Mirror Image of 1992?

It was *one* of those years; so much like 1992 that it was sometimes difficult to tell them apart. It was a year when you could have made or lost big money, depending on your inventory selections. It was a year in which dealers were reminded anew of the importance of inventory turns; with future market direction always uncertain, better to turn for a smaller certain profit than to hold in hopes of a larger but uncertain profit, or possibly even an eventual loss. With the overall market just on the downward side of flat, dealers were constantly reminded that it was next to impossible to try to go against the market; in a stellar observation, one dealer commented: "resistance is useless." The only way to "beat" the lackadaisical market was to get **more** customers, and specifically get **more** customers buying **more** coins. That was the real challenge of 1993, and one might add, the key activity identified by successful dealers.

Mint State Gold Type, a key series in the U.S. coin market, is representative of the entire market in many ways. Coming off of a serious rally at the end of 1992, Mint State Gold's uncertainty during 1993 turned into 'indifference'. The *CCDN Mint Gold Type Index* (as reported and charted in the *Bluesheet*) started the year at 640.37, sunk to the 609.81 level over the next 16 weeks, then rose to 674.02, from where it staged a slow slide to the 595.27 level at the end of 1993. To reinforce the similarities, take a look at the *CMI* chart for 1992 & 1993 for Mint State Gold Type and the overall *CMI* (the usual *Bluesheet* charts start in 1990). The Overall *CMI* is more steady (virtually by definition), but even the volatility of Mint State Gold Type is within a fairly narrow range.

Another way that Mint State Gold Type reflects the overall trends of the 1993 market is in the ability to either profit strongly or lose mightily, depending upon the coins selected (and more specifically, the grades of the coins selected!). In the tradition of our Leaders & Laggards charts, we present some of the best and worst performers in each series.

Mint State Gold Type Leaders		Jan. 93	Dec. 93	Change
\$10 Lib n/m	XF	\$210	\$250	+ 19%
\$10 Lib n/m	VF	\$190	\$225	+ 18%
\$2.50 Lib	MS60	\$200	\$230	+ 15%
Mint State Gold Type Laggards		Jan. 93	Dec. 93	Change
\$10 Lib n/m	MS63	\$11,000	\$8,000	-27%
\$5 Lib w/m	MS63	\$1,325	\$970	-27%
\$5 Indian	MS63	\$2,900	\$2,170	-25%

How important is grade in the selection process? The \$10 Liberty no-motto made both lists above! Across the entire Mint State Gold Type chart, the *average* Bid declined 1% during the year; VFs rose 7%, XFs rose 8%, AUs rose 5%, MS60s dropped 1%, MS63s dropped 8%, MS64s dropped 8%, MS65s dropped 9%, and MS67s dropped 3%. This was definitely the "year of the Circ."

Silver Commemoratives started 1993 at a 635.32 *CMI* level, and ended at 618.26, reflecting the same slight slippage that afflicted most series. Silver Commems enjoyed some really substantial increases, but the damage left by telemarketing efforts on Columbus' anniversary brought substantial losses as well.

Silver Commemoratives Leaders		Jan. 93	Dec. 93	Change
1947 BTW PDS Trio	MS64	\$48	\$86	+ 79%
1947 BTW PDS Trio	MS63	\$39	\$60	+ 54%
1934-D Oregon Trail	MS65	315	\$400	+ 27%
Silver Commemoratives Laggards		Jan. 93	Dec. 93	Change
1892 Columbian Expo	MS65	\$1,100	\$610	-45%
1918 Lincoln	MS65	\$715	\$400	-44%
1893 Columbian Expo	MS63	\$150	\$85	-43%

Across the entire Silver Commemoratives chart, Bids were relatively stable during 1993, especially in the lower grades. The *average* Bid dropped 3% during the year; the *average* XF/AUs and MS60s were unchanged, the *average* MS63 dropped a mere 1%, MS64s dropped 4% and the *average* MS65 declined 8%.

Gold Commemoratives started 1993 at a 682.28 *CMI* level, and ended at 626.27. It is significant that after several years of slipping Bids, Gold Commems have been enjoying quite a bit of plusing activity recently.

Gold Commemoratives Leaders		Jan. 93	Dec. 93	Change
1915-S Pan-Pac Expo \$1	MS64	\$1,250	\$1,510	+ 21%
1916 McKinley \$1	MS64	\$1,030	\$1,190	+ 16%
1922 Grant Memorial \$1	MS60	\$950	\$1,080	+ 14%
Gold Commemoratives Laggards		Jan. 93	Dec. 93	Change
1926 Sesquicenten. \$2.5	MS64	\$1,600	\$1,150	-28%
1916 McKinley \$1	MS65	\$2,980	\$2,250	-24%
1922 Grant Memorial \$1	MS63	\$2,040	\$1,560	-24%

Gold Commems, like their Silver counterparts, slipped an *average* 3% during 1993. The *average* XF/AU was unchanged, MS60s rose 1%, MS63s declined 4%, MS64s declined 2%, and the *average* MS65 dropped 10%.

Morgan Dollars started 1993 at a 774.71 *CMI* level, and ended at 757.37. As the chart below indicates, it was possible to earn a good rate of return buying some lower value Morgans; it was also possible to incur *substantial* losses by buying the wrong MS65s.

Morgan Dollars Leaders		Jan. 93	Dec. 93	Change
1893-O \$1	VG	\$40	\$62	+ 55%
1879-CC \$1	VF	\$52	\$80	+ 54%
1895-O	VG	\$47	\$72	+ 53%
Morgan Dollars Laggards		Jan. 93	Dec. 93	Change
1879 \$1	MS65	\$1,500	\$555	-63%
1899 \$1	MS65	\$1,300	\$500	-62%
1893-O \$1	MS65	\$150,000	\$60,000	-60%

On *average*, Greysheet Bids for Morgans declined only 1% during 1993, but it is obvious that the *average* hides much volatility. The *average* changes for each column follow: VG: +4%; F: +4%; VF: +2%; XF: +2%; AU: +3%; MS60: +2%; MS63: +1%; MS64: -3%; MS65: -17%; MS67: -3%. Definitely not a good year for the MS65s, the bellwether of the Morgan Dollar market.

Peace Dollars started 1993 at a 622.44 *CMI* level, and ended at 576.37. On *average*, Greysheet Bid for Peace Dollars declined 5% during the year. Like the Morgan Dollars, on *average*, circulated Peace Dollars turned in a much better performance than the "investment-quality" grades. The *average* changes for each column follow: VG: +4%; F: unchanged; VF: +3%; XF: +2%; AU: +3%; MS60: -2%; MS63: -12%; MS64: -18%; MS65: -28%; MS67: -5%.

Peace Dollars Leaders		Jan. 93	Dec. 93	Change
1925 \$1	VF	\$6	\$7.25	+ 21%
1923-D \$1	MS63	\$42	\$50	+ 19%
1935-S \$1	MS63	\$175	\$200	+ 14%
Peace Dollars Laggards		Jan. 93	Dec. 93	Change
1927 \$1	MS65	\$5,000	\$2,300	-54%
1922-D \$1	MS65	\$725	\$340	-53%
1924-S \$1	MS65	\$6,800	\$3,500	-49%

Mint State Type started 1993 at a 777.28 *CMI* level, and ended at 736.37. Next to Mint State Gold Type, Mint State Type is probably the most important indicator of market health - simply because it represents so many coins. It was not a good year, with the *average* Mint State Type coin down 7%. The *average* MS63 that we report was down 5%; MS64s were down 7% and MS65s were

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet): both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

down 9%. Again we see that the better material was hit the hardest. Combine that information with the results from the "circ type" chart, and the strength of the collector end of the market becomes apparent.

Mint State Type Leaders		Jan. 93	Dec. 93	Change
Draped Bust Half Dime	MS64	\$21,000	\$28,000	+33%
Lib Std Dime, No Drap.	MS64	\$1,210	\$1,500	+24%
Two Cent, Red & Brown	MS65	\$275	\$330	+20%
Mint State Type Laggards		Jan. 93	Dec. 93	Change
Lib Std Half Dime, No Drap	MS63	\$785	\$425	-46%
Large 1¢, Classic R&B	MS65	\$35,000	\$19,000	-46%
Lib Std Half Dime, Stars	MS64	\$875	\$550	-37%

The Leaders & Laggards on the Circ Type charts provide a useful comparison to the Mint State grades.

Circ Type Leaders		Jan. 93	Dec. 93	Change
Bust Half Dime	VG	\$13	\$18	+38%
Bust \$1, Lg Eagle	VG	\$270	\$360	+33%
Flowing Hair Half Dollar	MS60	\$10,500	\$13,750	+31%
Circ Type Laggards		Jan. 93	Dec. 93	Change
Dr Bust Quarter, Small	AU	\$17,000	\$13,000	-24%
Dr Bust Dime	VF	\$650	\$500	-23%
Wreath Large Cent	VG	\$1,100	\$850	-23%

On average, the circ type coin *gained* 1% during the year (as contrasted to the average 7% decline for Mint State Type). The average results for each column were: G:+2%; VG:+3%; F:+2%; VF & XF:unchanged; AU:-1%; MS60:+1%

Proof Type started 1993 at a 753.79 CMI level, and ended at 721.48. Although some individual coins on the Proof Type chart suffered staggering declines (especially among the higher grades), the average Proof Type lost only 3% during 1993. The average results for each grade were: Pr60:+3%; Pr63:unchanged; Pr64:-5%; Pr65:-10%.

Proof Type Leaders		Jan. 93	Dec. 93	Change
Indian Cent CN	Pr60	\$250	\$350	+40%
Lib Std Dime, Arr. 53-55	Pr64	\$11,500	\$15,000	+30%
Buffalo Nickel	Pr60	\$450	\$580	+29%
Proof Type Laggards		Jan. 93	Dec. 93	Change
Lib Std Half, No Motto	Pr64	\$2,450	\$1,510	-38%
Lib Std Half, W/Motto	Pr64	\$1,550	\$960	-38%
Lib Std Quarter, No Motto	Pr65	\$4,700	\$3,000	-36%

Proof Sets, one of the "staples" of the retail coin shop business, proved to be volatile as well during 1993. On average, Bid for the Proof Sets that we cover in the weekly "Greysheet" slipped 12%; that average, of course, hides some sets that nearly doubled, while others lost half of their value.

Proof Set Leaders		Jan. 93	Dec. 93	Change
1970-S no 'S' 10¢	Pr Set	\$300	\$575	+92%
1971-S no 'S' 5¢	Pr Set	\$520	\$775	+49%
1981-S	Pr Set	\$5.60	\$6.00	+7%
Proof Set Laggards		Jan. 93	Dec. 93	Change
1988-S Pres	Pr Set	\$44.00	\$22.00	-50%
1984-S Pres	Pr Set	\$37.00	\$22.50	-39%
1986-S	Pr Set	\$24.50	\$15.00	-39%

Mint Sets had a hard year in 1993; only two showed any advance at all, and most lost ground. On average, the Mint Set Bids that we report declined 12% during the year. Dealers have suggested to us that Mint Sets just don't seem to have the "pizzazz" of the Proof Sets when it comes to impulse buying, especially for Holiday gift giving. Proof Sets look "special", and make a "special" gift. Mint Sets seem well "dull" by comparison. Date & Mintmark collectors don't seem to mind, but Aunt Edna prefers the Proofs for presents.

The Coin Dealer Newsletter (USPS #008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

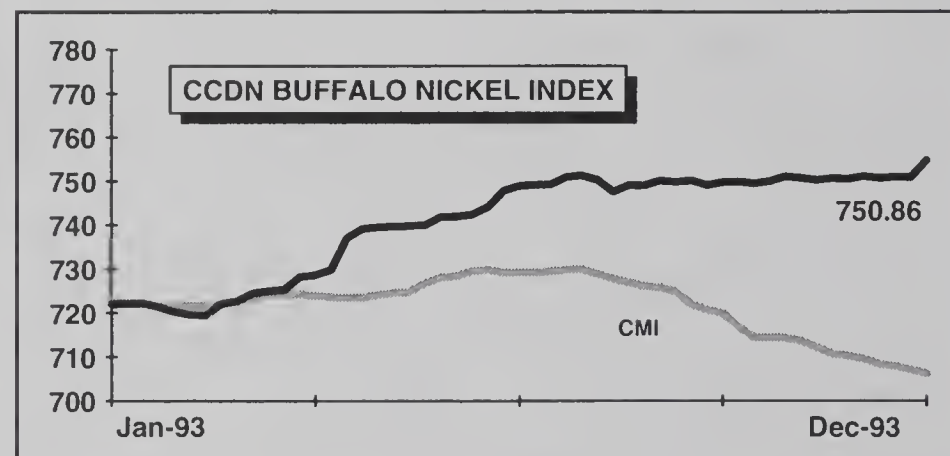

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

Mint Set Leaders		Jan. 93	Dec. 93	Change
1973	Mint Set	\$6.00	\$6.20	+3%
1968	Mint Set	\$2.25	\$2.30	+2%
1951	Mint Set	\$330	\$330	+0%
Mint Set Laggards		Jan. 93	Dec. 93	Change
1962	Mint Set	\$13	\$8.75	-33%
1990	Mint Set	\$6.20	\$4.30	-31%
1991	Mint Set	\$7.25	\$5.30	-27%

So, where was the "Good News" about the 1993 market to be found? Three of the weekly *Bluesheet* charts actually showed an increase in the CMI levels during the year. The Buffalo Nickels CMI increased from 721.93 to 750.86; Mercury Dimes climbed from 725.48 to 727.97 (OK, OK, but it still beats a decline); and Walking Liberty Halves rose from 723.17 to 748.92. I don't think it's a coincidence that it was our three specialty series that outperformed the market; that is the strength of a market driven by collector demand.

I will make only brief mention of the Roll segment of the market. Rolls, which had been ignored by many dealers for many years, seemed to regain some favor during 1993. They may not quite fit into the mentality of a carefully examined and encapsulated coin, but they did manage to provide some excitement. The runaway "Star" for 1993 was the 1982-D Nickel Roll, which climbed from \$5 to \$58; second-place went to the 1986-D Nickel Roll, which advanced from \$3 to \$23. Remember, none of these coins are rare until you try to actually find some in the marketplace.

Substantial "Good News" also came from the auction segment of the coin market. The four major auction companies (Bowers & Merena, Heritage, Stack's, and Superior) conducted more than 42 major auction sales during 1993, with a combined aggregate Prices Realized exceeding \$64 million dollars! That is one dynamic market segment! Lots under \$100, all the way up to Spectrum Numismatics Int'l's purchase of the King of Siam Proof set at \$1.815 million, 1993's auctions had 'something for everybody'. Spectrum also captured another numismatic treasure during 1993, when they purchased Reed Hawn's specimen of the 1913 Liberty Nickel out of Stack's Hawn sale for \$962,500. Not altogether a bad year, when you can purchase both an 1804 Dollar (in the King of Siam Set) and a 1913 Liberty Nickel.

As the CMI (the broadest based market indicator) demonstrates, 1993 left much to be desired. Most of the individual series slipped during the year, although nearly every chart contained some issues that performed very well indeed. A few series showed precipitous drops in selected areas, but most of the charts lost ground one coin, one trade, at a time. In short, like 1992, it was possible to either make or lose a lot of money during 1993, depending upon your luck, skill, and inventory turnover. On several occasions during 1993, it seemed that a serious rally was trying to start, only to be discouraged by some combination of reduced Bidding and increased discounted selling. In a market trying to make good news, fragile rallies seem to be too easily ended. Looking back years from now, dealers will have great difficulty differentiating 1992 & 1993; perhaps it will be sufficient that they survived the slow times to prosper in the next boom.

MONTHLY SUPPLEMENT *newsletter*

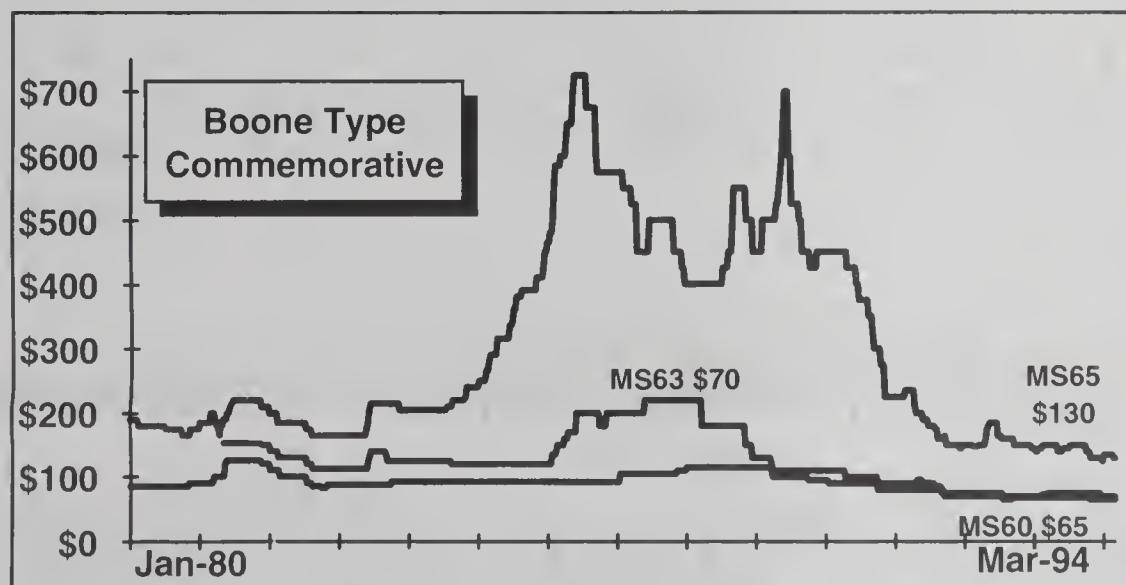

Vol. XIX No. 3

March 11, 1994

Single copy price: \$4.00

The Boone Bicentennial: A Legend of the Land, History In Your Hand

Let me start by saying that I like Daniel Boone. I like Davy Crockett, and if Paul Bunyan had been more real, I would have liked him too. The Pioneer movement was one of the forges hammering out the American spirit. This is a topic that truly belongs on our national commemorative coinage - the Oregon Trail, the Missouri Centennial, the California Jubilee. It was this same spirit of adventure that brought Columbus to these shores, and the waves of immigrants coming thereafter. Political correctness aside, this country was settled by men and women who were *compelled*, whether they were moving away from something old and confining, or towards something new and promising. I like Daniel Boone, I like the coin, and I like the fact that it is sufficiently available so that even Gem specimens of this neat coin are within every collector's reach. I also like the fact that the circumstances of issuance don't always make a whole lot of sense; that gives you something to talk about when showing off your coins to your friends.

The Boone Commemoratives have a great deal of artistic appeal. Augustus Lukeman's designs were basically stipulated by the Daniel Boone Bicentennial Commission, but Boone's portrait is fictitiously based on the imaginary artwork in Collin's 1847 *History of Kentucky*. As an historian, I know that we depend upon imaginary portraits for most figures from history; photography simply hasn't been available for most of human history. I also like the reverse; it is refreshing to see Pioneer and Indian talking face to face, although I am bothered by Lukeman's need to assign a great deal of incorrect history to what might have been simple allegory. Boone is depicted with Shawnee Chief Black Fish, supposedly discussing a treaty to end the siege of Fort Boonesboro in Transylvania (that's *our* Transylvania for you non-historians; if you think Kentucky, you'll be close enough). The meeting was historically impossible, but I still like the design.

There is one aspect to the Boone's design that I find fascinating, but to explain it best, you really need to own a 1921 Missouri Centennial. The two designs are so similar that it is tempting to use the term "identical". Two different artists, two similar designs; the portraits make a great identification quiz for your next coin club meeting. The Missouri Boone, possibly modeled on the Polasek bust of Boone, may be (or may not be) more accurate than the Boone Bicentennial obverse; since we don't know what Boone really looked like, such arguments can be amusing.

In the entire Silver Commemorative series, there have been many instances when Congress delayed approval of the authorization bill until after the anniversary had passed. This time, Congress started off on the right track. The Authorizing Act of May 26, 1934 was passed in sufficient time to allow for the 1934 coins to be struck in time (Oct. 1934) for the Bicentennial celebration of Boone's birth. In one of the stranger celebrations of a "*Bicentennial*", Congress extended the mintages with the Authorizing Act of 26 Aug. 1935. The Bicentennial of Boone's 1734 birth was celebrated from 1934 through 1938! Another great story comes out of the Authorizing Act of 26 Aug. 1935, which permitted the production of the 'dual' dated 1935-small 1934 coins (that's in addition to the 'normal' 1935 coins). This follows in the long tradition of encouraging the marketing of coins with "2x2"s, or "Stars", or "2*4"s. Our own generation is not immune to these temptations, as evidenced by the Madison Commemoratives. Some numismatists will complain that creating

such rarities *cheapens the entire Commemorative program*. I think they make for a jolly good story!

The high mintages of the Boone have made these neat coins readily available to today's collectors. All together, Congress authorized 600,000 coins, of which only 108,000 were actually minted (21,000+ of which were melted). Net Mintages of the individual coins follow. The multitude of packaging options, selling prices, and net mintages follow:

1934: Issue price: \$1.10; Net Mintage: 10,000

1935: Issue price: \$1.10; Net Mintage: 10,000

1935-D: Issue price: \$1.60; Net Mintage: 5,000

1935-S: Issue price: \$1.60; Net Mintage: 5,000

1935/1934: Issue price: \$1.10; Net Mintage 10,000

1935/1934 D&S: Issue price: pair at \$3.70; Net Mintage: 2,000 each

1936: Issue price: \$1.10; Net Mintage: 12,000

1936-D: Issue price: \$1.60; Net Mintage: 5,000

1936-S: Issue price: \$1.60; Net Mintage: 5,000

1937: Issue price: \$1.60; mostly available only in pair with 1937-D at \$7.25; Net Mintage: 9,800

1937-D: Issue price: first sold only with 1937 at \$7.25 for pair; then sold only as 1937 PDS trio at \$12.40; Net Mintage: 2,500

1937-S: Issue price: first sold at \$5.15; mostly available only in three-piece 1937 sets at \$12.40; Net Mintage: 2,500

1938 PDS trio: Issue price: only sold as trio at \$6.50; Net Mintage 2100 each

CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

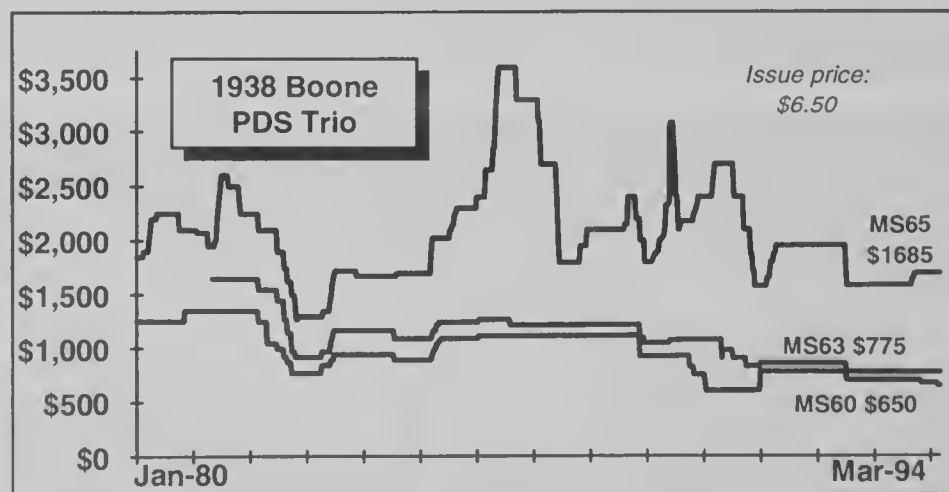

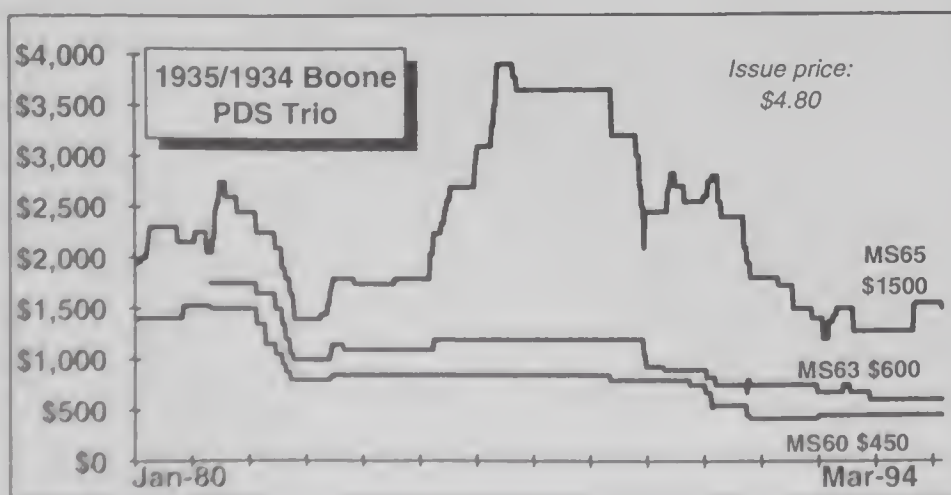

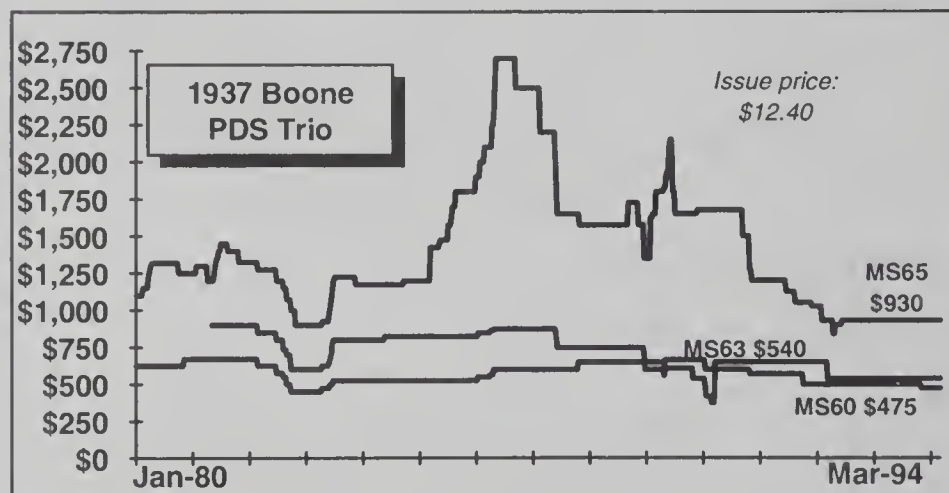

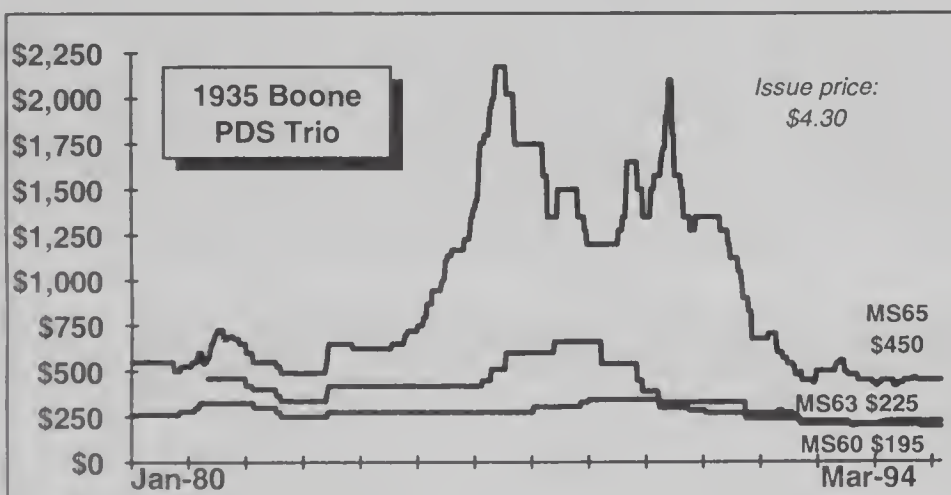

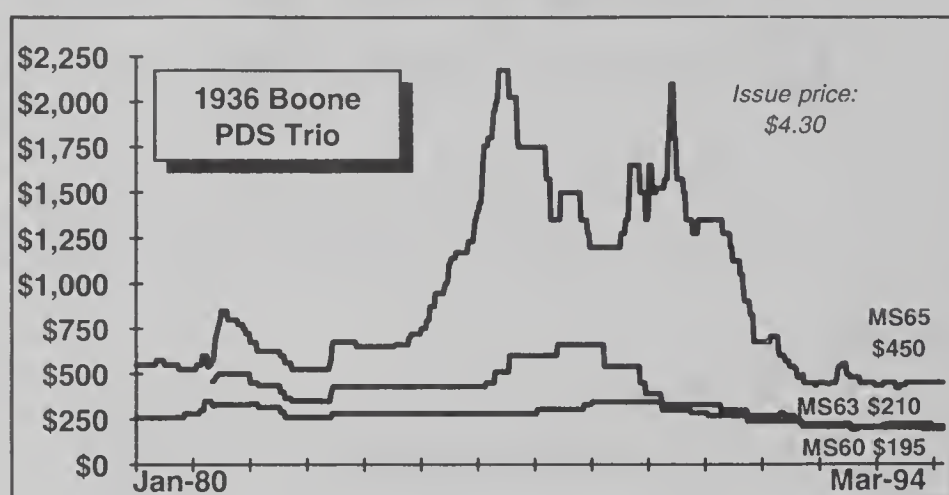

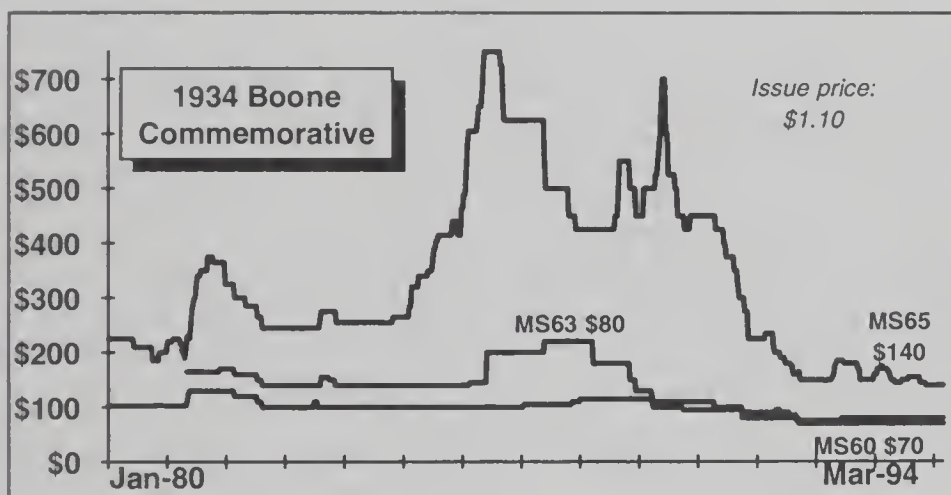

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter

P.O. Box 7939 • Torrance, California 90504

Don't you just love the idea of selling prices around double face? Even at today's 'low' levels, collectors did "O.K." with their purchases, as long as they could remember exactly which coins they ordered! The 1935/1934 and 1938 issues may have been created with low populations to justify higher prices, but the idea *is still working today* (as shown in the following CDN pricing charts). That is 'truth in advertising' of a sort.

Numismatists today will recognize that some of the abuses by the Boone program helped bury the Silver Commemorative program in 1939 (for more details, see Q. David Bowers' wonderful *Commemorative Coins of the United States; A Complete Encyclopedia*). Still, even the villainy is colorful, and nothing sells a handsome coin better than a great story to go with it! The Silver Commemoratives are still fun and a great part of our numismatic lore, and it's a shame that we had to do without them for so many decades. Hopefully, we'll show enough restraint so future numismatists cannot say the same about our generation's commemoratives.

The Grade and Authenticity of Your Coins Weren't Always Guaranteed.

Those Were the Days Before the Rare Coin Revolution.

If you collected rare coins prior to 1986, then you probably know the following scenario pretty well.

Sure, coin dealers used the Sheldon numerical scale...to grade their own coins.

And what of objectivity and standardized grading? There were lots of ethical and professional coin dealers around, but when it came to grading coins, the strong financial interest they had in their own inventory couldn't help but influence the way they viewed the coin.

And what about guarantees? Many collectors who tried to sell coins were surprised to find that a coin purchased from one dealer as an

MS65 might become an MS63 in the eyes of another dealer a year or

two down the road.

These issues posed serious problems for coin collectors prior to PCGS and the *Rare Coin Revolution*.

But it wouldn't be fair to blame coin dealers. This was standard operating procedure for an entire industry.

Independent, standardized grading, objectivity and grading guarantees were missing links that, if implemented, had the potential to provide improved consumer protection and strengthen the industry.

Before the Rare Coin Revolution:

A typical investment-quality raw Morgan dollar as it might be presented prior to 1986. Without objective grading methods and guarantees, the grade of this coin was strictly in the eye of the beholder.

PCGS...The Grading Standard Embraced by an Entire Industry!

In an innovative move, the Professional Coin Grading Service entered the scene armed with a concept that would change the way the rare coin industry would conduct business forever. Professional coin dealers and collectors throughout the nation would support the concept mightily.

Third-party grading meant never having to rely on one person's grading opinion again. Instead, coins would be graded by consensus, utilizing the expertise and experience of a minimum of three professional numismatists--in an environment free of financial conflict. Once graded,

PCGS would place each coin in a tamper-evident capsule. The first of its kind, the PCGS Numiscap™, offered solid protection for the coin, while providing PCGS with the ability to guarantee the grade. PCGS could now offer a true standard, objectivity, and an unprecedented cash-value guarantee to protect consumers against grading errors.

Today, PCGS celebrates its eighth anniversary, and continues to uphold a firm commitment to high standards of professionalism and the most reliable form of consumer protection known to collectors.

PCGS has introduced a lot of "firsts," but our success is owed to those who supported us in bringing widespread acceptance of third-party grading to the rare coin industry.

PCGS has now graded 3,397,692 coins with a cumulative declared value of \$4,510,815,802.

The Rare Coin Revolution clearly continues to work to the best interest of collectors and dealers today.

There's never been a better time to have your coins graded by PCGS. For a complete list of services and the names of the PCGS authorized dealers nearest you, please contact the PCGS customer service department at 1-800-447-8848.

An Entire Industry Embraces Change:

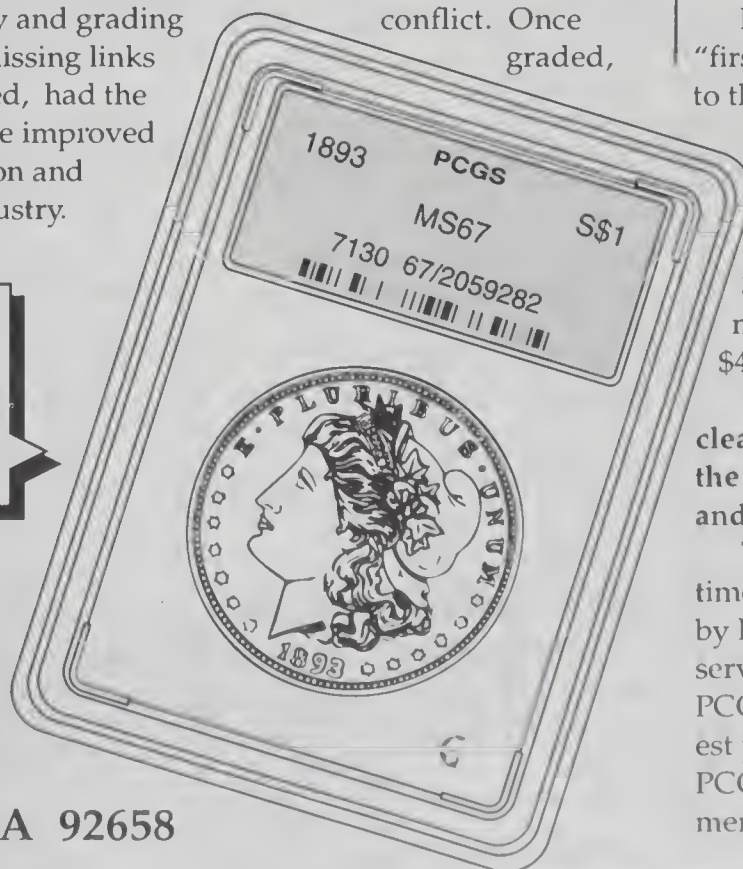

February 1986. PCGS introduces third-party grading, encapsulation and a powerful cash-back grading guarantee. This unique combination of time-tested consumer safeguards continues to work in the best interest of today's collector.

MONTHLY SUPPLEMENT *newsletter*

Vol. XIX No. 4

April 8, 1994

Single copy price: \$4.00

KEY DATE WALKERS: *the classics*

We received much positive feedback on two recent *CDN Monthly Supplement* articles; *Key Date Lincolns: the Classics* (in the November 12, 1993 issue) and David Lawrence's *Early Walkers: Today's Precious Gems* (appearing in the September 10, 1993 issue) and several dealers asked if we couldn't provide similar pricing charts for the "Key Date Walkers". Our pleasure.

But first, a word about Adolph Alexander Weinman's design. It's hard not to love this coin for its sheer artistry; collectors have consistently rated this as one of America's most beautiful coins. Beauty may indeed be in the eye of the beholder, but when so many people agree, it is safe to make it a statement of fact: This is one beautiful coin! However, much like the High-Relief Double Eagle of Saint-Gaudens, designs of beautiful coins are not always easy to strike. The higher the relief, the more difficult to fully strike. The more intricate the design, the more difficult to fully strike. The greater the relief and intricate design on both the obverse and the reverse, the more difficult to fully strike on either side. The early date Walkers are *tough* to find fully struck, but the design is impressive even without all of the details.

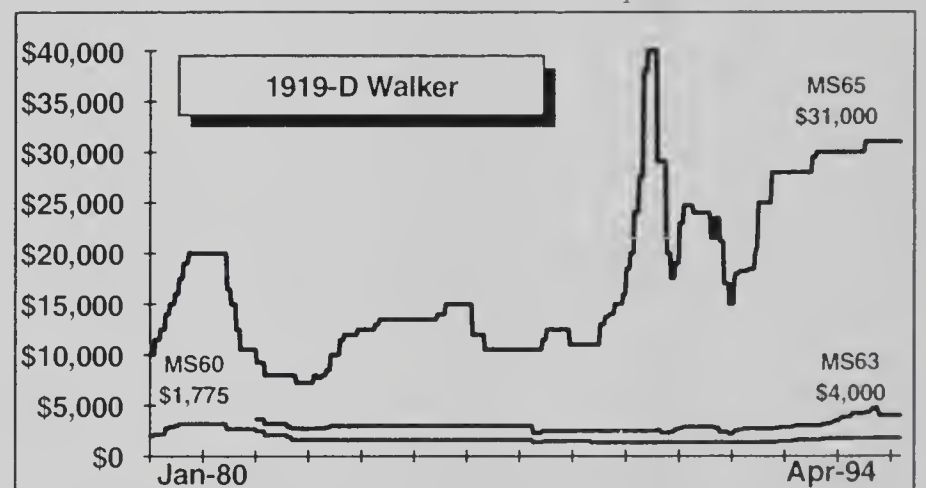

There is no doubt that Weinman was the big winner in the Treasury Competition for new coin designs, being accorded the privilege of designing *both* the new Dime and the Half Dollar. It is noted that Weinman's models met with some hostility from Mint Engraver Barber (who had difficulty in liking any designs except his own). We can attribute some of this to Barber's unhappiness over seeing his long-standing designs being superseded, but the *spirit* of the two designs is truly worlds apart. The plain truth is that Barber's head of Liberty is not particularly an "American" design; by that, I mean that the same profile could just as easily be placed on any coin from France (or a dozen other countries) without looking out of place. Weinman, on the other

hand, made *his* Liberty distinctive by wrapping her in an American flag. This may be his greatest stroke of artistic genius. It is unfortunate that some of the best detail is usually lost to the weak striking. Fortunately, Walkers look wonderful even when not fully struck!

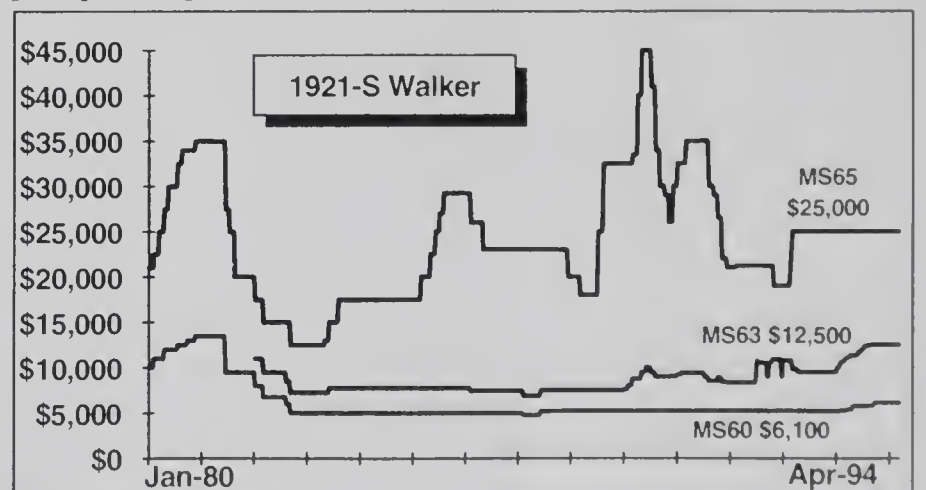

Most "Key Date" Walkers are to be found among the earliest issues, and especially the branch Mints. Mintages were often low to start with, and the coins circulated widely. That we have any high-grade Mint State survivors at all may be attributed to the efforts of a handful of dealers during the Thirties, who set aside rolls of the Branch Mint products.

The 1919-D is honored with the highest Bid for an MS65 Walker, currently standing at \$31,000. As noted in the chart at the end of this article, this issue also has the lowest total certified population (combined PCGS & NGC) in MS65, with only three specimens having been slabbed (and while the problem is certainly less acute on the rarest dates, we must mention the traditional caveat that resubmissions may have inflated any population count). The reported mintage for the 1919-D is one of the lowest in the series, and there is no question that this is *one rare coin* in Gem condition. Its rarity has been recognized in the demand that has characterized its recovery after 1991.

The 1921-S rates the second highest Bid in MS65, currently at \$25,000. With a total of 12 certified MS65 submissions, this is equally a very rare coin.

What is surprising, however, is that the 1918-D (the third highest Bid at \$17,500) also has an MS65 certified population of 12 pieces. Why the difference in Bid (\$7,500) between two coins with identical populations? Presumably, demand for these two dates should be equal; there are probably only a certain number of date collectors pursuing an MS65 collection, and the demand should be spread equally across the issues. Perhaps the 1918-D is easier to ob-

Key Date Walkers	MS65 Certified Population	Pop. Rarity Ranking	Current MS65 Bid	MS65 Bid Ranking	Total Reported Mintage	Mintage Rarity Ranking
1917-D Rev.	18	4—5	\$12,000	4	1,940,000	3
1918-D	12	2—3	\$17,500	3	3,853,040	5

CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet), both of which are published by CDN Inc. The Coin Dealer Newsletter is a wholesale coin market monitoring all possible transactions and offers to buy and sell coins. The Greysheet is a retail market monitoring all possible transactions and offers to buy and sell coins. Bids reported are for the current activity in the certified SIGHT UNSEEN market; such bids may include coins that are not available for certification for a particular service. Bids for a "Raw" coin may be higher or lower than a certified coin due to current market conditions. The CDN may not change Bid just because a dealer has a strong influence on the market. The CDN may not change Bid just because a dealer has a strong influence on the market. The CERTIFIED COIN DEALER Newsletter provides bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

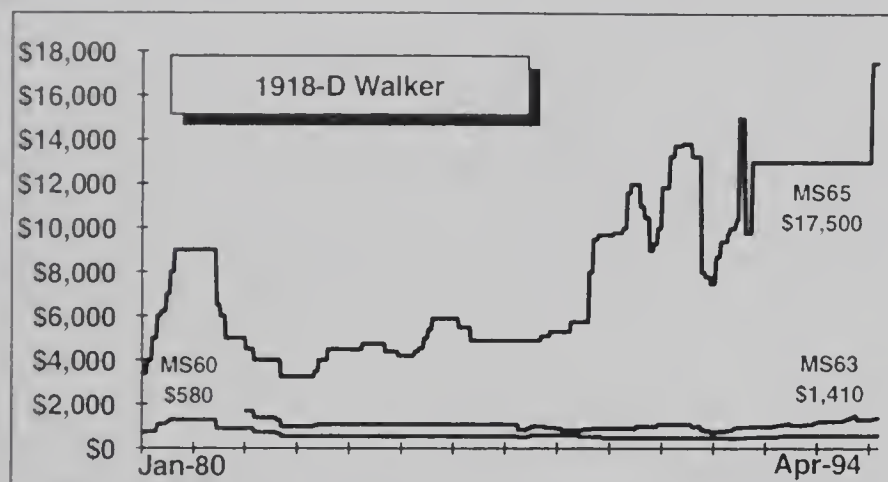

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter

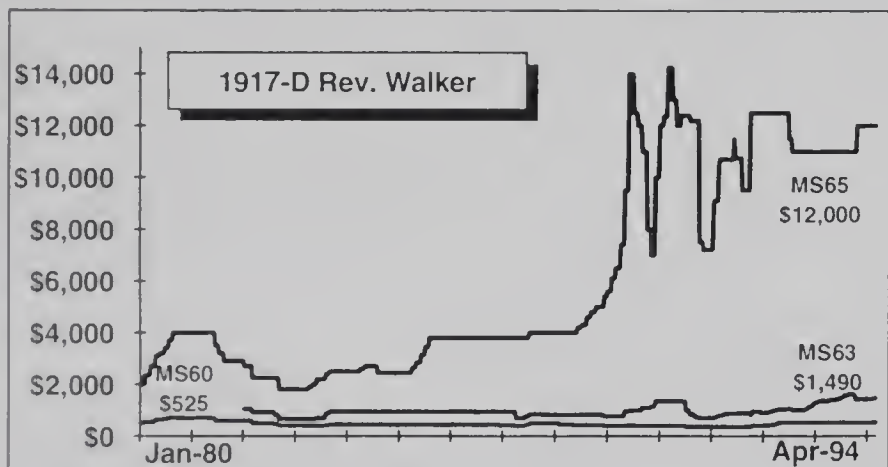

P.O. Box 7939 • Torrance, California 90504

tain in the marketplace. We know that there are more than twice as many certified Mint State (60 and above) specimens of the 18-D in the marketplace, but how large a population in MS63 is required to hold down the price in MS65; or should it matter at all?

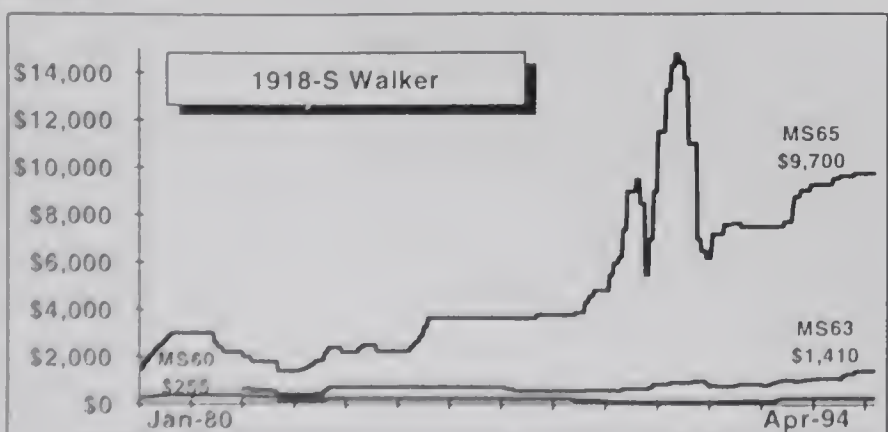

Or, is it just that 21-S has "always been" more valuable? After all, its original mintage of only 548,000 is much smaller than the 18-D's 3.85 million pieces; it must be worth more, right?

The 1917-D Reverse and the 1918-S also share an identical MS65 certified population, with 18 pieces of each recorded.

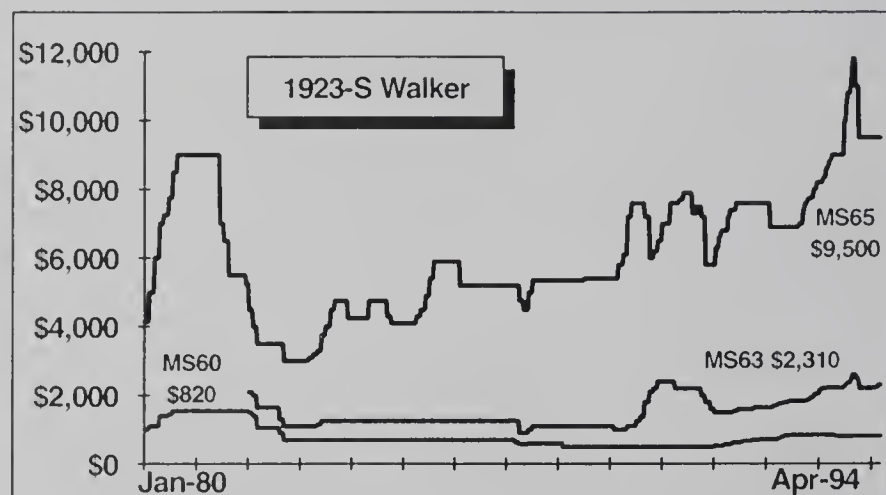

Here too, there is a substantial difference in current MS65 Bid, with the 1917-D at \$12,000 and the 1918-S at only \$9,700. And here again, the *total* Mint State certified population of the 18-S is substantially higher than the 17-D; and here again, the 18-S's mintage of 10.3 million is far above the 17-D's 1.94 million.

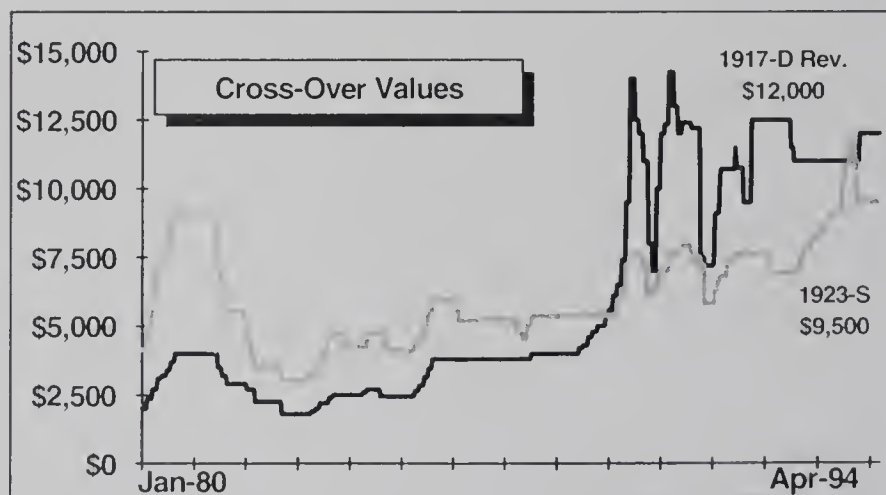

Is *general rarity* still more important than the *actual* certified population, or is Bid ultimately determined by the *floating* population in the marketplace?

The last of the six Key Dates that we graphed is the 1923-S, with an MS65 certified population of only twenty pieces, and a current Bid of \$9,500.

I have a dealer friend who prides himself on his pragmatism; he answers all questioning about one coin being worth more than another with the phrase "*Because they are!*" That is true enough, but I still think that the subject of population *versus* price is a worthy area of exploration. I will leave you with one last chart and observation.

For most of the Eighties, the 1923-S in MS65 was worth considerably more than the 1917-D Reverse. After mid-decade (about the time the Pop Reports became important), the 17-D soared above the 23-S, only to find themselves equal five years later, followed by another substantial spread. Why the changes in pricing patterns? We can probably eliminate recent changes as resulting from considering original Reported Mintages, as our sophistication is much greater on that particular point. Did dealers change their perceptions of the relative values of these two coins because of the Population Reports in MS65? The Pop Reports above MS60? Retail demand? Dealer demand (if one can separate that out)? Changes in floating supply in the marketplace? Maybe "*because*" really is the best answer.

PELICAN PROTECTOR CASES

Pelican cases are ideal for the
carrying and protection of coins
in that all sizes are watertight,
airtight, and virtually un-
breakable with a lifetime
guarantee. Constructed of
light weight spaceage structural resin,
they are extremely durable with a high weight
carrying capacity made easier by comfortable
molded handles. Cases can be externally locked
for added security and most meet airline carry
on regulations. Standard with each case is pre-
scored pick n' pluck foam or the optional
padded divider sets available with selected
sizes. Please call toll free for our color brochure
and price list.

Barber Halves

High Grades are Highly Prized, But Hard to Find

Part I

by David Lawrence

This is the first of a series on Barber coinage. I last wrote an article on these neat coins for the *CDN Monthly Supplement* in May of 1990, and these coins are sorely in need of an update.

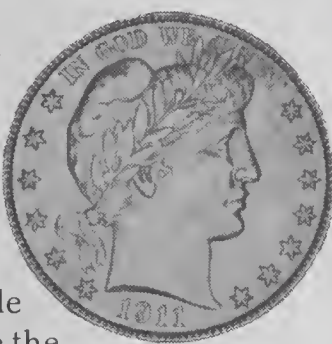

For the serious collector/investor, Barbers are in a unique position. They were made just before coins became popular, and unlike the Mercury Dimes, Standing Liberty Quarters and Walking Liberty Halves which followed, they have very low survivorship in Mint State. I am starting with the Half Dollars because they are the largest and most popular among collectors. Prices for common date certified Barber Halves have dropped along with most Type coins in the last few years, and they are currently too low, in my opinion. At today's levels, nice coins are not being sold back into the market in any quantity; those that do come out are quickly snatched-up by eager collectors.

The analysis here follows the same form as that for early Walking Liberty Halves which appeared in the September 1993 *CDN Monthly Supplement*. I have started by combing the certified populations for PCGS and NGC as of March 1994. The dates are ranked in the accompanying table, and I have again created an MS63 Price Index and a Gem Price Index to compare relative values. The MS63 P.I. is derived by multiplying the total population in Mint State by the *CDN Monthly Supplement* MS63 "Bid" for each given date, and dividing by 1000 to make the result more manageable. For the Gem P.I., the Index is obtained by multiplying the combined certified population in MS65 and above by the "Bid" level in MS65, and likewise dividing by 1000.

The coins with the lowest Index are the best value, but comparisons *should not* be made across the two indexes. Barber Halves with an MS63 P.I. of less than 50 are undervalued in general in Uncirculated condition in today's market; those with an Index over 85 are relatively expensive. For Gem coins, the Index has surprisingly little spread; except for the 1892-P (which was saved as the first year of issue), all are relatively scarce, and the current "Bid" levels seem to be adjusted to the scarcities. Those with a Gem P.I. below 30 are a great buy - but just try to find them! All common date Gem Barber Halves are underpriced at today's level of \$1850; nice coins just won't come out at this level — not when they used to be more than \$5,000.

Date Analysis

1892-P, O & S: These first year of issue dates are all plentiful in Mint State. The '92-P comes with a nice strike and

has the highest certified population by far in the series. It makes a nice Type coin, but has the highest Price Indexes, and strictly speaking, is therefore the "worst buy." The '92-O & S are both scarcer in low circulated grades than in XF and AU. Neither is a good buy in MS63 (P.I. = 91 & 98, respectively), but the '92-O is reasonable in Gem B.U. (P.I. = 35). The New Orleans coin sometimes comes softly struck, but nice specimens can be found.

1893-P, O & S: '93-P is fairly abundant in Mint State (rank = 53) and comes with a decent strike, though not often with flashy luster. Only 10 Gems have been certified and it is a good buy. Both the "O" and "S" are more interesting. The '93-O has a surprisingly high total Mint State population (78 coins), but is very scarce in Gem (only 3). Most come with weakness on the Reverse — on the eagle's claw and upper right shield. The 1893-S is among everyone's favorite dates. It comes well-struck and flashy, and is scarce in all grades above VG. This is the only date in the series with no Gem Uncs certified. Buy nice MS63 & MS64 coins, if you can find them! All three Mints of 1893 are undervalued in Gem condition.

1894-P, O & S: These come with nice luster. The "P" & "S" are usually well-struck, while the "O" is unlikely to have strong detail on the Reverse. Both mintmarks are good buys in MS63 and MS65. The '94-S has a Gem Pop of only 3, and a low Gem P.I. (= 24). Incidentally, the '94-P is very tough to find from Good through VF; I challenge anyone to put a roll of Goods together in two-year's time — it can't be done!

1895-P, O & S: A similar situation to the 1894 issues. The "P" ranks 49th in total Mint State and comes well-struck. It is reasonable in Gem B.U. (P.I. = 35). The '95-O has the lowest Pop of the three issues and is priced in the middle of the Barber Half series (MS63 P.I. = 50; Gem P.I. = 41). Surprisingly, some well-struck coins are available. The '95-S is additionally desirable because it is scarce in all circulated grades.

1896-P, O & S: A good year for Barber Halves. The "P" is very tough in most circulated grades, but enough specimens have survived in Mint State (Pop = 65) to make it available. The "O" and "S" are scarce in almost all grades. They rank 4th and 5th (Tied) respectively in total Mint State Pop. Their scarcity is no secret, and they are priced accordingly. However, they still have relatively low MS63 P.I.s (= 44). The 1896-O is rare in Gem condition (Pop = 2) and quite undervalued (P.I. = 20). Both mintmarked dates should be bought if they can be found. The few Mint State '96-O Halves I've seen have been decently struck. The "P" and "S" usually come nice, though S-mint Barber Halves sometimes have planchet striations.

1897-P, O & S: The '97-P is common in Mint State (Pop = 106), though a good buy in MS65 (P.I. = 33). The '97-O & '97-S are both rare coins that somehow have become available in Gem condition. Both dates are extremely tough to find in XF through MS62. For the 1897-O, 18 of the 37 certified MS coins are Gems, while for the '97-S, Gems comprise 11 of 32. These are the only Barber Halves with this strange Population profile. Though the Gem P.I. for each is a fairly high 70, these coins are still worth buying because the coins are so scarce overall.

CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT UNSEEN** market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The **CERTIFIED COIN DEALER** Newsletter provides Bids for certified coins only.

1898-P, O & S: The "P" is common and comes nice, but the 1898-O is a different story. This date was long thought to be either the first or second toughest date in the set; it is not quite that, although it does rank 8th (Tied) in overall Mint State, and is Tied for fifth in Gem condition. In addition, it usually has one of the poorest strikes; nice specimens are rare indeed. In circulated grades, Fine through AU, it is right there with the 1904-S in scarcity. In contrast, the '98-S is fairly common in circulated grades, especially in XF and AU50, but was not saved in Mint State. Surprisingly, the 1898-O is undervalued in Gem condition (P.I. = 21). The "S" is a good buy in all Mint State grades. Both the "O" and the "S" should be bought at today's levels, if eye-appealing specimens can be found.

1899-P, O & S: The three 1899 issues are similar to those of 1898, but the "O" and "S" are more available than the '98 mintmarked issues. The "P" is common and usually well-struck, as are most P-mint Barbers. The "O" is available also, but only 8 Gems have been certified. For an "O"-mint, this date comes with a decent strike. Only the "S" is particularly desirable, and then only in Mint State. Like the 1898-S, the '99-S is a "Philippine Hoard" date and new coins were not saved. XF and AU50 pieces are abundant. Mint State coins are usually brilliant and well-struck, and generally bring a nice premium over listed values. However, with 12 Gems and a Gem P.I. of 66, the high-grade 1899-S coins are fully priced.

1900-P, O & S: Similar to the 1898 & 1899 years. The "P" is common and the "O" and "S" are scarce in Mint State. In fact, the 1900-O is ranked third rarest of the 73 dates in the set in overall Mint State; only one Gem has been certified, ranking it 2nd to the 1893-S in this category. With a Gem P.I. of only 12, this coin is a *must buy* at anywhere near current levels. The 1900-S is plentiful in XF and AU, but is Tied for 14th in Mint State, and Tied for 16th in Gem condition. The three "Philippine Hoard" dates ('98-S; '99-S; 1900-S) were overlooked in Mint State before the days of Population Reports. In recent years, they have been picked up by knowledgeable collectors.

1901-P, O & S: The "P" is a Type coin in general, but highly undervalued in Gem condition with only six certified (Gem P.I. = 21). The "O" ranks 8th (Tied) overall and 5th (Tied) in Gem Uncirculated, but was thought to be even scarcer. At \$2,300, it's no bargain in MS63, but Gems are not really overpriced at \$12,000. Old timers knew the '01-S was rare, but it took the Pop Reports to prove it. With only 18

The Coin Dealer Newsletter (USPS #008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly *Coin Dealer Newsletter (Greysheet)* is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter
P.O. Box 7939 • Torrance, California 90504

certified, it ranks second to the '04-S overall, and is Tied for 5th in Gem Unc. However, its Price Indexes are not especially low (MS63 P.I. = 54; Gem P.I. = 32).

1902-P, O & S: In this year, the surprise is the "S", which ranks eighth (Tied) overall, and is on everyone's Want List. The 1902-O comes poorly struck, and some certified coins are lackluster, though I know of at least one fully-struck Gem. In Barber Halves, buy any well-struck O-mint coins you can find; they will always be the 'cream of the crop'.

Barber Halves

High Grades are Highly Prized,
But Hard to Find

Part II

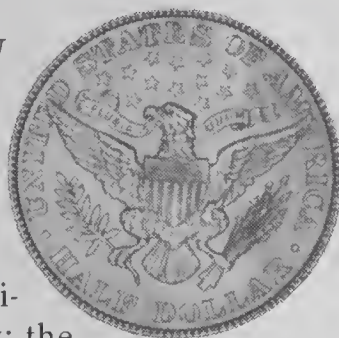

by David Lawrence

In last month's issue of the *CDN Monthly Supplement*, we began our examination of the Barber Halves, covering the issues from 1892-1902. Prices in Part II (as in Part I) are from the April 1994 *Monthly Supplement*. To repeat my professional opinion, prices for certified Barber Halves are currently too low; the few nice coins that are being sold back into the market are quickly purchased by eager collectors. Looking at the current population profiles and prices, the 'best buys' can be identified for more profitable attention.

The analysis here follows the same form as that for early Walking Liberty Halves which appeared in the September 1993 *CDN Monthly Supplement*. I have started by combining the certified populations for PCGS and NGC as of March 1994. The dates are ranked in the accompanying table, and I have again created an MS63 Price Index and a Gem Price Index to compare relative values. The MS63 P.I. is derived by multiplying the total population in Mint State by the *CDN Monthly Supplement* MS63 "Bid" for each given date, and dividing by 1000 to make the result more manageable. For the Gem P.I., the Index is obtained by multiplying the combined certified population in MS65 and above by the "Bid" level in MS65, and likewise dividing by 1000.

The coins with the lowest Index are the best value, but comparisons *should not* be made across the two indexes. Barber Halves with an MS63 P.I. of less than 50 are undervalued in general in Uncirculated condition in today's market; those with an Index over 85 are relatively expensive. For Gem coins, the Index has surprisingly little spread; except for the 1892-P (which was saved as the first year of issue), all are relatively scarce, and the current "Bid" levels seem to be adjusted to the scarcities. Those with a Gem P.I. below 30 are a great buy - but just try to find them! All common date Gem Barber Halves are underpriced at today's level of \$1850; nice coins just won't come out at this level — not when they used to be more than \$5,000.

1903-P, O & S: What happened to all the 1903-P Barbers — Dimes, Quarters, or Halves? At least the Dimes and Quarters are available in circulated grades, but the Half is tough in *all* grades. Even VGs are hard to find, and always sell well. We can all read the Pop Reports, but we don't always believe what we see. The "P" Half is still undervalued (MS63 P.I. = 32; Gem P.I. = 27). The "O" ranks 21st overall, which surprises me — I thought it was scarcer! Still, buy any with eye-appeal that you can find.

The "S" comes sharply struck and nice examples can be found.

1904-P, O & S: These three issues are desirable. The '04-P is a sleeper, ranking 23rd (Tied) overall and Tied for 11th in Gem condition. Both Price Indexes are low (MS63 P.I. = 35; Gem P.I. = 14). In contrast, both the '04-O and "S" are known scarcities. Before Pop Reports, we would have thought the "O" scarcer than the "S", but it has been evident for several years that the '04-S is the 'King of the Barber Halves.' Only 10 of the '04-S have been certified in Mint State, and a few of these are lackluster. This issue should be bought in any grade from Fine up. The '04-O comes flashy, but can be weakly struck. It ranks 8th (Tied) overall and a surprisingly high 27th (Tied) in Gem condition. The P.I.s are not low, because its reputation is better than its scarcity.

1905-P, O & S: Another interesting year for Halves. The "P" and "O" are both low mintage, but the 1905-S is the scarcest in Mint State, ranking 17th overall (Tied) and 11th (Tied) in Gem condition. The Indexes are fairly low (MS63 P.I. = 48, Gem P.I. = 30). For the '05-P, there are 58 certified in Mint State, ten of which are Gems; 12 of the 48 Mint State '05-Os are Gems. Neither date has a low Price Index in MS63 or Gem condition. Still, the "P" and "O" are scarce coins in most circulated grades and highly desirable. The '05-S is only really tough in AU55 or above. All three coins are recommended in 'eye-appealing' Mint State. The 1905-O comes weakly struck, and fully-struck coins should not be expected. Accept one with a moderate strike if it has flashy luster.

1906-P, D, O & S: The first year of the Denver Mint, and some Branch Mint proofs are believed to exist. For the year, the "O" is the scarcest, ranking 28th (Tied) overall and 16th (Tied) in Gem condition. Both the "O" and "S" are sought in VF through AU55, and both are presently undervalued in Mint State in general (MS63 P.I. = 38 & 44, respectively). In Gem Uncirculated, the "P", "D", and "O" are all underrated (Gem P.I. = 28, 21 & 23 respectively), while the "S" is fully priced relative to the others (Gem P.I. = 56). Gems of the "P" and "D", in particular, should be snatched up when available. There are only 6 Gems of the '06-D, and 5 of the '06-O have currently been certified.

1907-P, D, O & S: All but the 1907-S are common dates, with Mint State Pops of more than 100 coins each. The "S" is a great coin, however, ranking 5th (Tied) overall and 11th (Tied) in Gem Unc. It is the scarcest Half after 1904, and is on everyone's Want List in all grades above XF. Though the Price Indexes do not "jump out at you", buy this coin if available. Even lackluster specimens sell as soon as they appear in the market. The 1907-O suffers from a type of die buckling referred to as "mumps" (because the jaw and/or neck may be lumpy); it is also a weakly struck issue. Near-perfect specimens are in the minority and worth buying.

1908-P, D, O & S: The "D" and "O" are common dates, and the "P" is only slightly better. The '08-S is scarce - second only to the '07-S among dates after 1904. With a total Pop of 31, it ranks 13th in the series. Nice specimens should be bought in any grade above Fine. Relative to other Barber Halves, the '08 P is undervalued. Its MS63 P.I. is less than half that of the '08-D and '08-O

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.
INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.
Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.
Address all subscription remittances to:
the COIN DEALER Newsletter
P.O. Box 7939 • Torrance, California 90504

(45 vs. 103 & 105, respectively), and equal to that of the '08-S. In Gem condition, the '08-S is underpriced, but the "P" and "D" are good buys too!

1909-P, O & S: The "P" is one of the most available dates in the set, while both the "O" and "S" are better dates. Of these, the '09-S is a surprise, having a lower Pop than the "O" overall (47 vs. 53), despite having almost twice the mintage. With an MS63 P.I. of 42, the '09-S is undervalued in all Mint States below Gem. None of the three issues are particularly cheap in MS65 and above (Gem P.I. = 50, 67 & 53, respectively).

1910-P & S: The "P" is low mintage and hoarded in low grades (G - F). Enough new coins have been saved to rank it 40th (Tied) overall, but it is still a good buy in all Mint State grades (MS63 P.I. = 54; Gem P.I. = 30). The '10-S is scarcer from MS60 to MS64, but 13 Gems (vs. 9 for the '10-P) have been graded. Strong collector demand makes the '10-S a good buy in lower uncirculated grades, despite an MS63 P.I. = 57.

1911-P, D & S: The "D" has the lowest mintage (695,000), but the "S" is the toughest, ranking 20th overall with just seven Gems. Nice Mint State specimens of the '11-S should be purchased in any grade. The '11-P is common in all grades, while the "D" is presently undervalued in Gem condition (Gem P.I. = 33).

1912-P, D & S: The "P" and "D" are common in all grades, while the '12-S is a better date and undervalued in most uncirculated grades (MS63 P.I. = 45).

1913-P, D & S: All three are low mintage, especially the '13-P; however, enough of the Denver issues were saved (105 certified) to make it fairly common — except in Gem condition. In Gem, with just 5 certified, it is vastly underpriced at present (Gem P.I. = 19). The '13-P has strong collector demand in all grades from Fine up, but a surprising 44 Uncs are certified. Though 3rd lowest in mintage (only 188,000), it ranks 25th in overall Mint State, and 53rd (Tied) in Gem; still, demand exceeds supply for this issue. The '13-S is a good buy in Mint State (MS63 P.I. = 48) and Gem Unc. (Gem P.I. = 34), but I would try to choose nice specimens.

1914-P & S: The '14-P, with a mintage of only 124,000, has great demand, but of the three low mintage years, it has been saved the most (Pop = 82, ranking 48th overall). However, until recently, no Gems had been certified; today, there are just three, and Gems are a good buy at current levels. However, some caution has been called for, because there are a lot of MS64s, and if just a few are upgraded, the price will surely drop! The '14 S has a lower Pop than the '14-P, but quite a few more Gems survive: it's underrated below Gem condition (MS63 P.I. = 35).

1915-P, D & S: The "D" and "S" were saved as the last year of issue, and are high Pop coins. The '15-P, like the '13-P & '14-P, had a very low mintage (138,000; 2nd lowest in the set), but some new specimens were saved (Pop = 47, ranking 26th [Tied] overall). It is similar to the '13-P in Mint State scarcity, and, like

that date, also has great collector demand in circulated grades. With just 9 Gems, it's a good buy (Gem P.I. = 32) and there aren't nearly as many MS64s out there as is the case with the '14-P (eliminating concern about potential upgrades).

for over a quarter of a century, collectors needing confidential direction and reliable advice have successfully turned to

Julian Leidman

Professional Numismatist & Consultant

With complete confidentiality, I will custom tailor my services to fit your numismatic needs. I can assist in the *formation of your collection*, with more than 25 years as a professional, I can locate the U.S. coins or currency you need. I can provide you with *confidential advice*, just as I have for collectors, other dealers, attorneys and corporations. I can assemble *high-quality investment packages*, profitable investments always begin with the purchase. I can act as your *personal representative* for any numismatic transaction, take advantage of my decades of experience for a maximum commission of 10%. I can also assist in the *orderly disposition* of your holdings, to make sure that you receive top dollar in the marketplace. Between buying and selling, I can *appraise* your collection or individual pieces. You know your needs best, contact me for *expert* advice.

the COIN DEALER

MONTHLY SUPPLEMENT *newsletter*

Vol. XIX No. 7

July 8, 1994

Single copy price: \$4.00

Key Issue

Commemoratives:

the expensive classics

This may rank as the understatement of the year, but there are *many* ways to collect coins. One characteristic that collectors probably share, however, is starting with (and here read "purchasing") *lower-value* coins. I've talked to *many* collectors over the years, and nearly all told a similar story: 1) They get interested in coins, courtesy of Dad, Uncle Al, Aunt Martha, Grandpa, the neighbor just returned from France, or the Boy Scout troop leader; 2) They make small purchases, while starting to read about grading, history, etc.; 3) They begin to get more sophisticated about their investment/hobby, and get serious about references, pricing trends etc.; 4) As they begin to feel more confident about the coins and themselves, they feel *more* comfortable buying *more* expensive coins. A corollary occurs even when a sophisticated collector starts a new series, buying the Type coins (the 'common dates'). The same logic applies here, as it allows a lower-risk approach to getting familiar with the characteristics of the series, while maximizing the coin "bang" you get for your "buck". Fair enough.

Every once in a rare while, though, you meet a collector who takes a different approach. I was greatly influenced by a sophisticated investor, during the boom years of the late seventies. This astute individual pointed out that during an up-cycle in the coin market, the more expensive coins get even *more expensive* at a *much faster* rate than the cheaper coins. As I later paraphrased this observation, "In an up-market, the rich get costlier." Practically speaking, this trend could make it prohibitively expensive to complete a date-set, since by the time you could afford to buy the rare dates, you *couldn't* afford them anymore! Well, you know what I mean. In time, I took his approach one step further. When I began to assemble a Twentieth Century Type Set, I decided to purchase the *rarest* date of each type (for obvious reasons, this approach is not recommended for the Nineteenth Century Types, nor for Twentieth Century Gold). It was definitely an experience, although collectors who insist upon buying only MS65 coins might want to check their bank balance first!

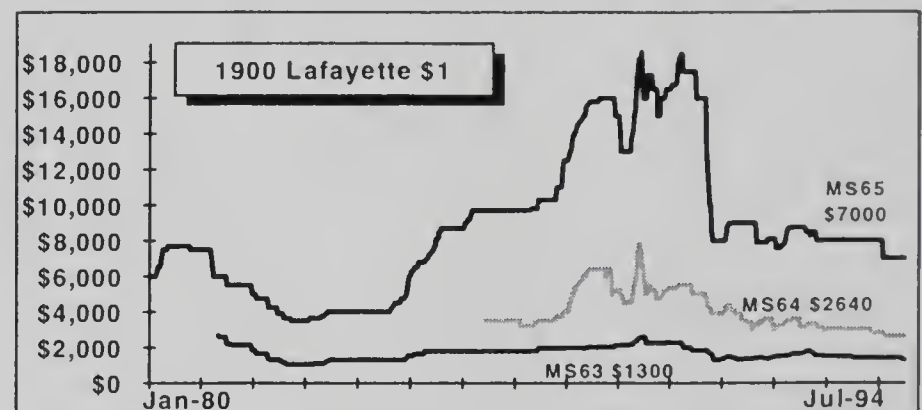

Following in that tradition of buying *only the best*, I thought we might take a look at the Bidding history of today's six most expensive Silver Commemoratives. Anyone who has paid attention to Commems since 1980 will immediately realize that the "*rarest*" in 1980 are not necessarily the "*rarest*" today. The current Bid Leaders in MS65 are the 1900 Lafayette Dollar at \$7,000; the 1922 Grant with Star at \$7,000; the 1921 Missouri at \$5,750; the Missouri 2x4 at \$5,750; the 1926 Sesquicentennial at \$4,660; and the 1928 Hawaiian at \$4,320. The chart below shows the ranking of these Bids in 1980 and 1994.

CDN — MS65 Most Expensive Commems	JULY-94 MS65Bid	JULY-94 65 RANK	JAN-80 CDN Bid	JAN-80 65 RANK
1900 Lafayette Dollar	\$7,000	1—2	\$6,000	1
1922 Grant Memorial with Star	\$7,000	1—2	\$2,300	4
1921 Missouri Centennial	\$5,750	3—4	\$1,900	6—7
1921 Missouri Centennial 2x4	\$5,750	3—4	\$2,100	5
1926 Sesquicentennial	\$4,660	5	\$150	58
1928 Hawaiian	\$4,320	6	\$3,000	3
1915-S Pan-Pac Expo	\$2,280	10	\$4,800	2
1935 Spanish Trail	\$905	16	\$1,900	6—7

Let's see how this strategy worked for an investor buying "the best" in 1980. The most expensive Silver Commemorative in 1980 was the Lafayette Dollar at \$6,000, which is currently Bid at \$7,000; not a spectacular increase, considering inflation, but certainly more respectable than a loss.

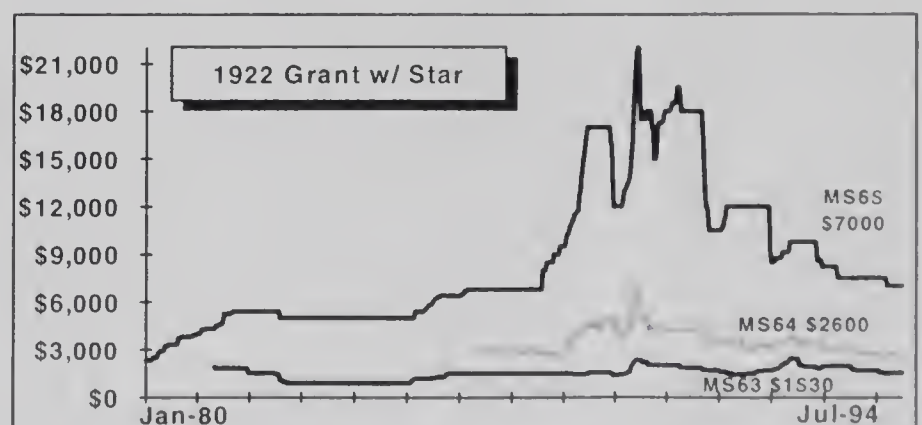

So, what happened to the Panama-Pacific Half Dollar? Its Bid in MS65 has slid to \$2,280, putting it in the #10 spot currently. Some, but only some

of the explanation for this slide can be traced to the Population Reports. The Pan-Pac Half has a current combined PCGS & NGC population in MS65 of 951 pieces! This Gem, beautiful as it may be, is simply *not* as rare as once thought. Even considering all the resubmissions and other caveats in using the Pop Reports, this is a fairly "common" rare coin in MS65, especially when compared to the populations of the six coins being examined. Still, populations are only *part* of the story. The Lafayette has a certified pop of 153, which is the *fifth highest* of our six coins; the Grant with Star, also Bid at \$7,000, has only 91 pieces certified in MS65! Clearly the demand for Lafayettes has kept Bid at the highest level despite the 'large' population.

While the Lafayette is currently Bid only \$1,000 above its 1980 level, a look at the pricing graph will show that owners of this neat coin had plenty of opportunity to take a substantial profit on their purchase. The Lafayette Bid peaked at \$18,600 in mid-1989; while this would have provided a tripling of the initial Bid, it wasn't the most spectacular return among Commems in general, or even among the six leaders. The Grant with Star peaked at \$22,000 in mid-1989, and the 1921 Missouri at \$19,000! Still, the Lafayette's performance was *solid*; no point in getting greedy.

Let's take a look at the 1922 Grant Memorial with Star. Currently tied for first-place honors with a \$7,000 Bid, in 1980 it would have cost only \$2,300. Here is a coin with a real story, that was substantially cheaper to buy, is tied for most expensive today, and in between was worth even more! With a certified population of only 91 pieces (the lowest of our six price leaders), it *deserves* to be more valuable. In MS65, the Grant also exhibits one benefit not found in the Lafayette. For most of the 1980's, it would have been *extremely* difficult to have lost serious money with this coin; the Lafayette, on the other hand, slumped for more than three years coming off its 1980 high!

To look at this investment comparison a little differently, in 1980, a buyer of a Lafayette at \$6,000 who sold at the \$18,600 peak would have made a \$12,600 profit. Not bad! That same \$6,000, however, would have purchased two Grant with Stars at \$2,300 each, with enough left over to buy 9 MS65 Sesquicentennials at \$150 each. Selling at the peak of the market in 1989 would have yielded a profit of \$166,300, *thirteen times as much*! Isn't hindsight grand? Sharp-eyed readers will have noted that this alternative purchasing scenario leaves us with \$50 to spare with that we could have purchased.... Well, you get the idea. There is a *great deal* to be said for diversifying your portfolio to maximize your collecting pleasure and your investment opportunities!

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

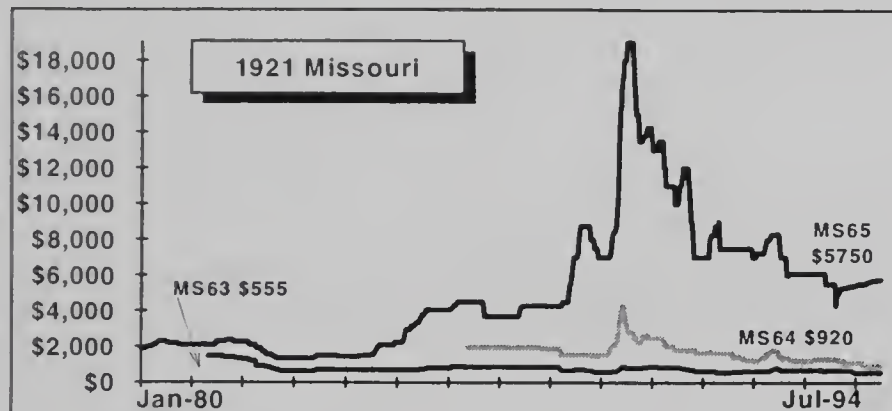

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

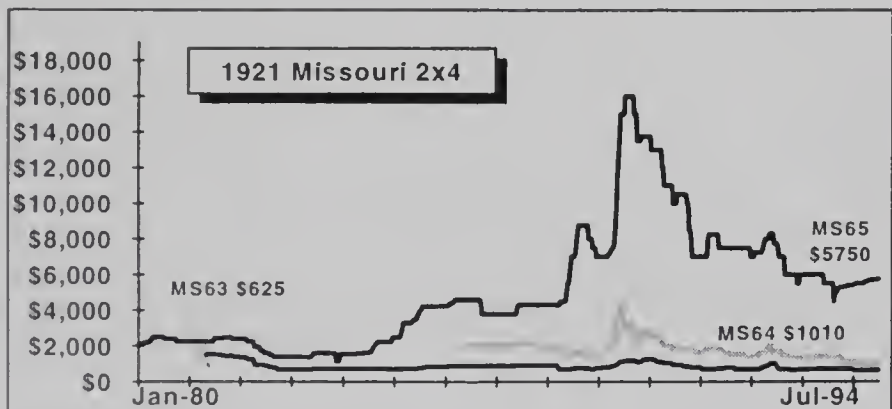

Address all subscription remittances to:

the COIN DEALER Newsletter

The Missouri and its 2x4 'clone' exhibit a fairly 'typical' Bid history for the coin market. A slight dip after the 1980/81 highs, followed by steady growth until the 1988/89 boom years, followed by a fairly steady decline to current levels. The 'plain' version has a certified population of 132 pieces in MS65, while the '2x4' shows only 103 pieces; yet both coins hover around the \$5,700 Bid level. Curiously, the greater rarity of the 2x4 was recognized in the 1980 Bid levels, yet the 'plain' version easily won the battle of the peak price in 1989, with a high Bid of \$19,000 compared to only \$16,000 for the '2x4'. Who ever said that coins have to act logically? Or numismatists, for that matter?

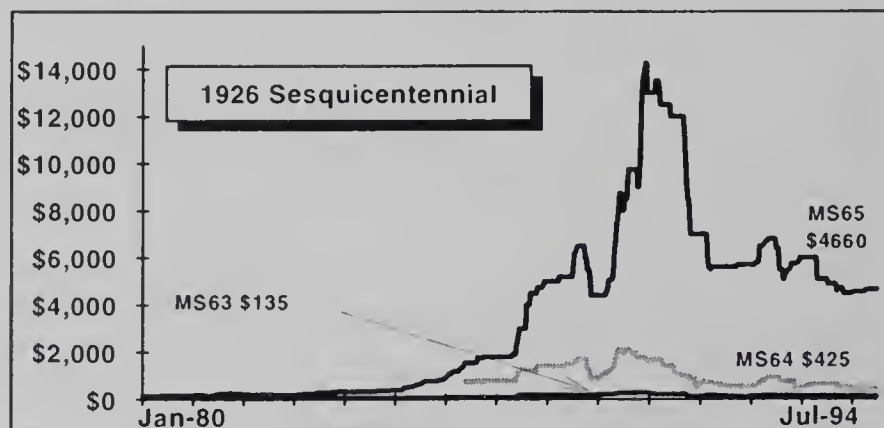

The Hawaiian Silver Commemorative, one of the nicest looking coins in the series, has always been a popular coin. In 1980, its \$3,000 Bid made it the third most expensive Commem; at its current \$4,320 Bid, it is in sixth place. Much of this movement can be accounted for by a population of 206 certified pieces in MS65, the most of any of the six coins we are considering. Still, this is a coin with a lot of demand beyond the usual Commemorative collectors.

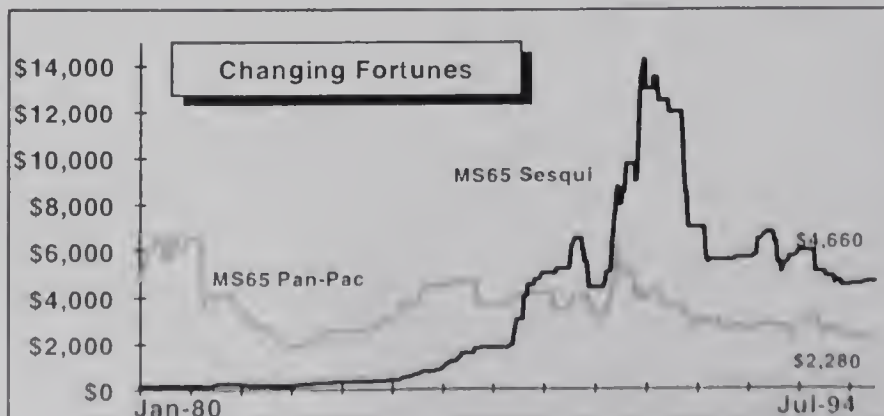

We have loved our 'favorite' (OK, OK, it's hard to imagine anybody calling this their favorite coin) Commem until last, despite the design and striking deficiencies of this coin, which are substantial, by its very nature

it illustrates some important considerations. First, all of our long-term price charts assume that a properly graded coin was purchased in the first place. That is, the profits involved with buying MS65 Lafayettes at \$6,000 and selling MS65 Lafayettes at \$18,600, depend upon the coins still being MS65s when certified. Due to changing grading definitions, standards before PCGS was created were somewhat volatile (as volatile as prices became after 1986, but that might be a future article). In the 'good old days' everybody used a special yardstick for the Sesqui, just because they were such lousy strikes. A really nice strike was "Gem, for a Sesqui". PCGS's initial decision to apply a uniform standard to all coins meant that the phrase "for a Sesqui" no longer applied. The finest example known of some coin might be only an MS62; it may be the finest known, but it is still only a 62 when compared to other specimens.

Not coincidentally, the number of 'less than 65' Sesquis helps account for another interesting contrast. Among the other five leaders, the Bid levels for MS63 examples range from the \$555 low for a 'plain' Missouri to a high of \$1,530 for the Grant with Star. The Sesqui is currently Bid at \$135 in MS63. As a Gem, this is a rare coin; as an MS63, it would have to be called "common". Therein lies the real problem with our earlier scenario yielding the \$166,300 profit; in order to achieve that, our buyer would have had to buy 9 of the 121 currently known MS65s. There were discerning buyers in 1980, as there are today, and this example reinforces the value of always obtaining the best possible examples for the grade.

We cannot leave without touching on two less fortunate coins from the 1980's 'top six' list. The 1915-S Panama-Pacific Exposition Half was the second highest Bid in 1980 at \$4,800, yet today the coin is Bid at only \$2,280 (the tenth most expensive Commem). The Spanish Trail was tied for Sixth in 1980 at \$1,900, yet today can be obtained for only \$905. The Pan-Pac has a certified population of 355 pieces in MS65, and the services have slabbled a whopping 951 Spanish Trails in MS65. Gem Sesquis became more rare, and Gem Pan-Pacs became more common. The result in pricing levels should come as no surprise.

Business Strikes Rarer Than Proofs?

The Evidence is Reflected in Bid Histories

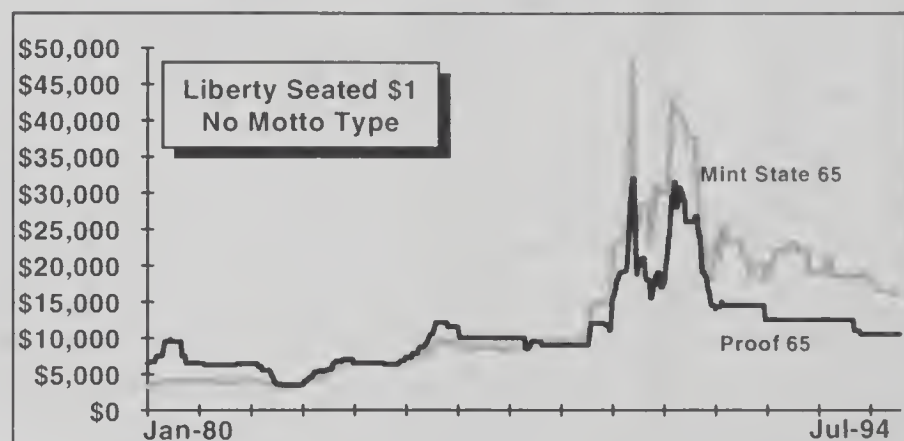

Life was a lot easier in the "good old days". Everybody knew that Proof coins were rarer than Mint State, and therefore worth a great deal more. It only took a quick look at the mintage figures, and everybody *just knew*. Today, the Population Reports from the Professional Coin Grading Service (PCGS) and the Numismatic Guaranty Corp. (NGC) have given us a much more accurate indication of the *existing* populations of quality coins. The numbers aren't perfect, because of untracked resubmissions and non-submissions, but they remain critically important. In many cases, high-grade Mint State specimens are much rarer than the Proofs, and are priced accordingly. Demand acts on the existing population profile in different ways — one more reason why active participation in the market requires up-to-date pricing information.

There is a certain logic to Mint State strikes bidding at higher level than Proofs. Collectors of Gem coins are only interested in *how many have survived in Gem condition*, regardless of the size of the initial mintage. It matters not that millions may have been minted, if all were circulated and there are no Gems to be found. While Proofs were nearly always minted in extremely low numbers, they usually were purchased by collectors who carefully preserved them. There was an inclination to *spend* business strikes, and an inclination to *preserve* Proof strikes. No wonder that so many wonderful, gem-quality proofs have survived!

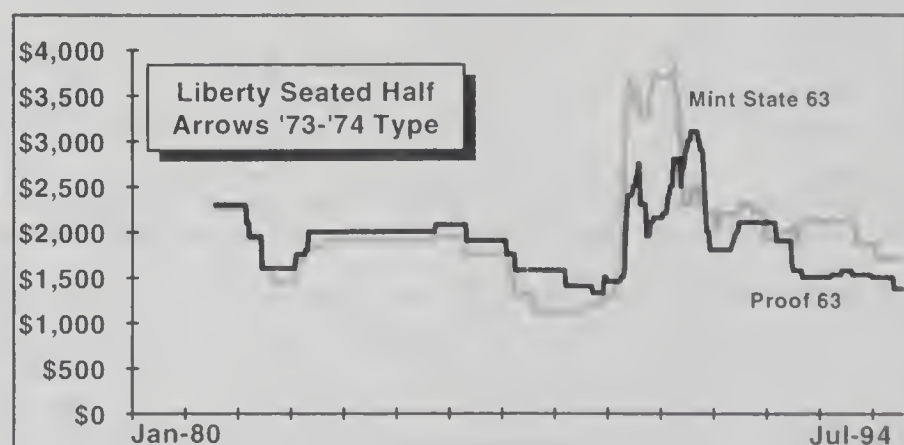

Let's look at some of the issues where business strikes are currently valued higher than Proofs. The Liberty Seated Dollar, With-Motto Type (1866-1873), is currently Bid at \$22,500 in MS65 but only \$7,750 in Proof65. Business strike mintages for the W/M \$1 exceeded 3.6 million coins, but the Combined (PCGS & NGC) Certified Population (hereafter ComboPop) for the business strikes is only 15 pcs!; only 6,060 W/M Proofs were minted, but the Proof65 ComboPop is currently 147 pcs! Interestingly, the MS64 (ComboPop = 82 pcs.) is also currently Bid higher than the Proof64 (ComboPop = 456 pcs.), but the Proof63 (ComboPop = 393 pcs.) is Bid higher than the MS63 (ComboPop = 105 pcs.). Obviously, Population statistics are not the only factor in pricing.

Looking at the spreads over time may shed some additional light on perceptions of rarity. From the start of 1980 until late 1982, Proof65s were higher than MS65s - as much as 95% higher, nearly double! The lead seesawed during 1983, MS65s were higher during 1984, Proofs were higher 1985-86, and they seesawed again in 1987. Only during 1988 did the Mint State pieces begin to be consistently higher; they are now nearly triple the Proof65 Bid! Before 1988, little demand one way or the other could swing the market; after 1988, the market remained certain about rarity.

The Liberty Seated Dollar, No-Motto Type is also Bid higher in MS65 at \$16,000 than in Proof65 at \$10,500. The spread is much tighter than the With-Motto Type, as are the Pops; the ComboPop for the Proof65 N/M is 103 pcs., while the ComboPop for the MS65 N/M is 47 pcs. Unlike the case with the With-Motto, the Proof64 No-Motto is Bid higher (albeit ever so slightly) than the business strike. Prior to 1988, the Bid history is virtually identical to the With-Motto Type, with more certainty afterwards.

The Liberty Seated Types with Arrows (1873-1874), in all denominations, provide interesting prices for our perusal. For the Half Dollars, the business strikes are more valuable in 60, 63, 64, and 65! In 65 grade, the MS65 at \$12,000 (with a ComboPop = 12 pcs.) is almost twice as expensive as the Proof65 (ComboPop = 21 pcs.). This two-year Type also provides us with some curious situations in other denominations. Since the chart for the Arrows Half in 65 is very similar to the two Dollar Types already presented, we thought the Bid history in MS63 might be more instructive. In 63, the Mint State Types did not assert their rarity until 1989. The MS63 ComboPop = 70 pcs., while the Proof63 ComboPop = 107 pcs.

The Liberty Seated Quarter Dollar, Arrows (1873-1874) is Bid higher in MS63 (at \$1,150) than in Proof 63 (at \$960 Bid). In 64 and

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet) both of which report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell coins. The coins may be certified or "Raw" (uncertified) but the grading MUST ADHERE to the current standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of a fee attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

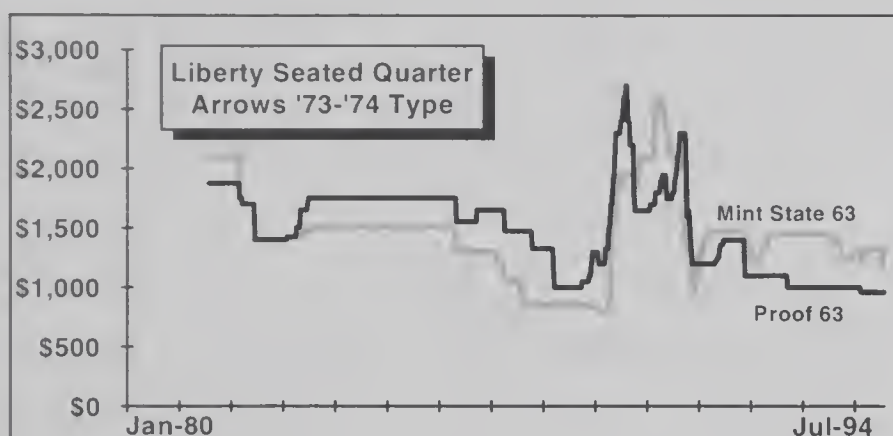

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

65 grades, however, it is the Proof striking which commands the premium. The ComboPop for the MS63 is 52 pcs., while the ComboPop for the Proof63 is 80 pcs. And just to show that just maybe life wasn't so simple after all in the "good old days", I suppose I need to point out that while the Arrows Quarter in Proof65 currently commands a handsome premium (69% or \$1,925) over the Mint State 65, in 1980, the MS65 was Bid higher than the Proof65!

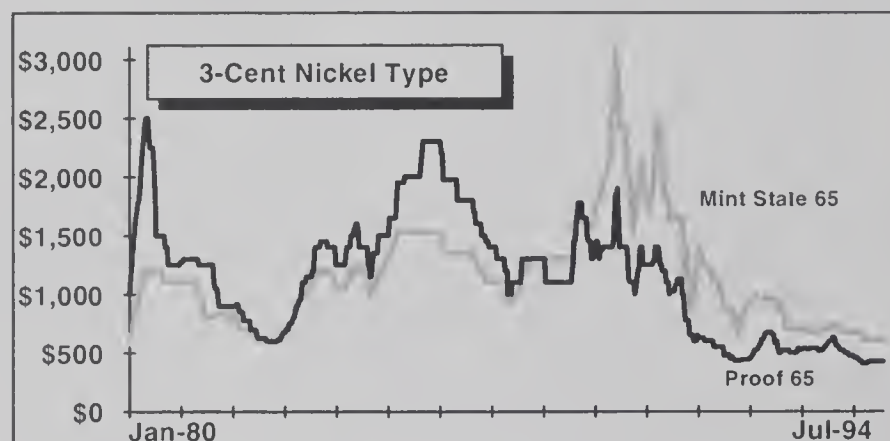

In the Liberty Seated Dime, Arrows (1873-1874), the business strike is valued above the Proof in 64 grade only! The CDN didn't cover the 64 grade until 1986. In MS64, the '73-'74 Arrows Dime (ComboPop = 81 pcs.) is Bid at \$1,800, while the Proof64 (ComboPop = 116 pcs.) is Bid at a much lower \$1,350. In 63 & 65, the Proofs bear a nice premium over the Mint State coins: the Proof63 ComboPop = 97 pcs. compared to an MS63 ComboPop

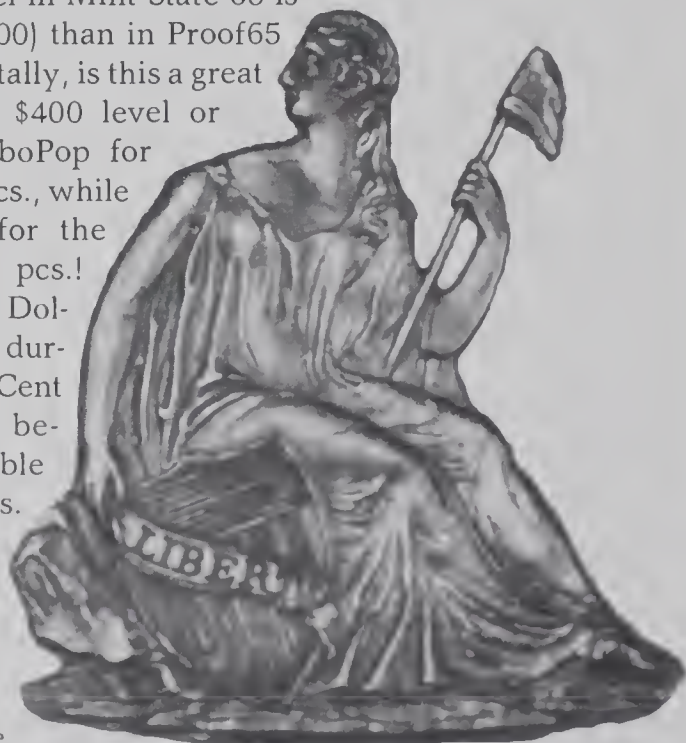

= 74 pcs.; the Proof65 ComboPop = 35 pcs. against the MS65 ComboPop = 39 pcs. Go figure!

Continuing with our examination of seated examples of Miss Liberty, the Trade Dollar in 65 is Bid slightly higher in Mint State 65 (at \$5,850) than in Proof65 (at \$5,300). The ComboPop for the business strikes is 92 pcs., while 397 pieces in Proof65 have been certified! Unlike most of the charts so far, the Proof65 Trade Dollar lead solidly (as much as double!) until early 1989, when the MS65 asserted its strength - no seesawing here!

Just to show that we bear no grudge against other designs, the Three-Cent Nickel in Mint State 65 is Bid higher (at \$600) than in Proof65 (at \$425). Incidentally, is this a great coin around the \$400 level or what? The ComboPop for the MS65 is 840 pcs., while the ComboPop for the Proof65 is 6252 pcs.! As with the Trade Dollar, no seesawing; during 1988, MS65 3-Cent Nickels simply became more valuable than the Proof65s. Everybody knows that they are rarer, right?

Better information means more accurate pricing, and today's market is in possession of *much more* accurate information on population profiles than it had in 1980. Accurate information, however, still has to factor in demand. And demand is not always logical! While we have concentrated on the Population statistics for single grades, pricing decisions often factor in all Mint State survivors vs. all Proof survivors. The real question facing the coin business is not necessarily whether Mint State or Proof Specimens are more desirable, but how to make *both* more desirable.

for over a quarter of a century, collectors needing
confidential direction and reliable advice have successfully turned to

Julian Leidman
Professional Numismatist & Consultant

With complete confidentiality, I will custom tailor my services to fit your numismatic needs. I can assist in
the *formation of your collection*, with more than 25 years as a professional, I can locate the U.S. coins or
currency you need. I can provide you with *confidential advice*, just as I have for collectors, other dealers,
attorneys and corporations. I can assemble *high-quality investment packages*, profitable investments always
begin with the purchase. I can act as your *personal representative* for any numismatic transaction; take
advantage of my decades of experience for a maximum commission of 10%. I can also assist in the *orderly*
disposition of your holdings, to make sure that you receive top dollar in the marketplace. Between buying and
selling, I can *appraise* your collection or individual pieces. You know your needs best, contact me for *expert*
assistance.

Generic & Gem A Look at the Walker Pop Profile

I have a coin dealer friend who delights in asking questions that sound quite simple (and sometimes even 'simplistic'), yet end up being *most* perplexing. He has short-term and long-term criteria for judging the 'simplicity' of his questions: short-term, he listens to the loudness of the groan; long-term, he waits for the Monthly Supplement article! This time was even worse, because he had two questions lined up.

"How accurate do you think the Population Reports are?" I recognize a loaded question when I see one. I immediately and knowingly launched into the two most obvious caveats. 1) Many coins were submitted several times to the services (either to the *same* service, or to the 'other' service), in the hopes of obtaining a higher grade, *without* the removal of former submissions. 2) Many worthy coins in personal collections have never been certified, where they may reside for decades to come. While this means that the reports must always be 'flawed' in their specifics, they are generally a very useful tool for establishing rarity. "I see," my friend said, "you think the services have seen many coins not at all, and others all too often." From the twinkle in his eye, I knew he was going to bring up the Gold Dollar of a friend, who was not satisfied with the MS65 grade received from the first, and second, and third submissions; on the *tenth* resubmission, he got his MS66, but he had inflated the MS65 Pop Report by a full 10% in the effort! We both felt a little guilty about that, having provided so much encouragement in the effort.

My friend allowed that 'yes, an imperfect tool is better than no tool at all - if you understand how to properly use it' - but then came back with his second loaded question. "So, believing that the Pop Reports are really useful, albeit flawed due to the resubmissions of many *rarities*, how closely do you think the *Certified* Population Profile of Mint State Type Walkers matches the *Actual* Population Profile of Type Walkers?" My friend is getting better at this game; he has learned to specify the series up-front, knowing that I like to buy myself a little thinking time by responding to his open-ended questions with the comment '*It depends* - it varies according to the series, and could he please be a little more specific'. I must be getting a little better, too, because I was ready for this question.

I *generally* think that the Pop Reports have been getting better over time, because the larger numbers chip away at the two main caveats: 1) Over time, more of the raw coins are making their first appearance in the Pop Reports, and 2) The higher cumulative counts make the errors from resubmissions less critical as a percentage. To be entirely fair, I will report that some strongly disagree with my conclusion, believing that the growing counts include increasing numbers of resubmissions! We shall never know. Having an established opinion, I decided to respond with an oblique 'counter-attack'. "I think that the Certified Pop Profile for Type Walkers was more accurate years ago than it is now."

Silence, while he rechecked the positions of his pawns. "How so?" he responded weakly. "First, let's make it clear that we are talking about Walkers, and only Walkers, and that you agree not to try to confuse my flow of logic by interjecting any observations about other

series. Except Morgans, 'cause I think much the same applies to them. Are we agreed that there are Rolls and Rolls, Bags and Bags of late-date Walkers out there that have never been certified? Who knows how many bags have been buried by moonlight in backyards across America?" He winced as he remembered stubbing his toe in the dark and using the wrong end of his shovel as a crutch.

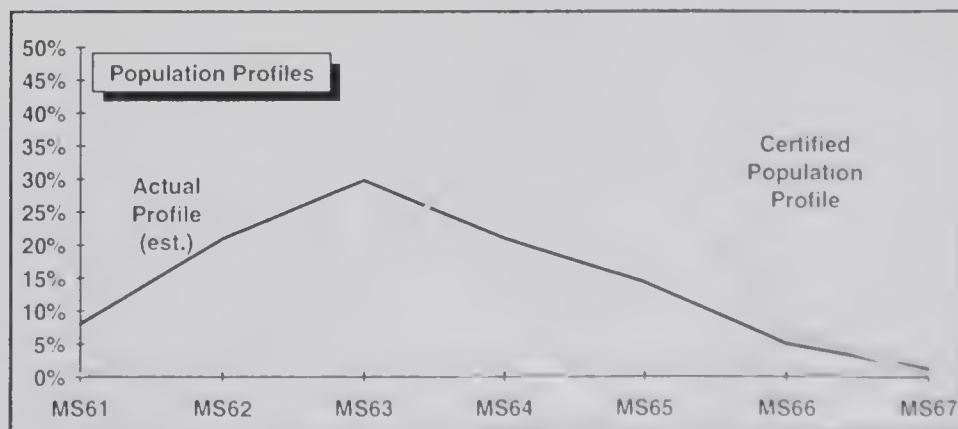

Having agreed that there were just 'oodles' of Rolls and Bags of Walkers out there that had never been certified, I decided to try a flanking maneuver. "Let's think about just one of those bags, an *average* bag, for a moment. Would you agree that it probably contains more MS66s than MS67s?" "Yes." "More MS65s than MS66s?" "Yes." "More MS64s than MS65s?" "Yes." "More MS63s than MS64s?" "Yes." He was getting bored even as the noose was tightening. "More MS62s than MS63s?" That question was met with a hard stare. Over the years, we had divvied up many Rolls and a bag or two, and there was always the question of whether the MS62, MS63, or MS64 stack would be higher at the end. Depending on how much 'travel time' the bag had suffered, MS62s or MS63s were usually the majority. "*It depends*." Ugh, hoist on my own petard - I knew he would get a charge out of that. Rather than dignify his use of such an obvious stalling tactic, I came back with what I thought was the more interesting question. "Do you think there are more MS61s than MS62s?" "No, we both know that." Over the years, experience taught

POPULATION PROFILES OF WALKING LIBERTY HALF DOLLARS							
	MS61	MS62	MS63	MS64	MS65	MS66	MS67
Certified Profile	0%*	3%	15%	39%	35%	7%	1%
combined PCGS & NGC counts as percentage, all coins							
Actual Profile (est.)	8%	21%	30%	21%	14%	5%	1%
average of combined estimates of leading numismatists							

us that it was difficult to make an MS60 or MS61 in a bag; that required as much effort as preserving an MS67 - *you had to work at it!*

Although my friend didn't know it at the time, I had already resolved to ask this question of America's leading numismatists. I just find it curious that you *almost* always find more lower grade than higher grade, across the board, from Good to Gem. There are more XFs than AUs, more VFs than XFs, etc., etc. If no bags had been saved, you would expect every higher grade to have fewer survivors, but the Rolls and Bags themselves created different circumstances of survival. The results of my survey follow:

We will add our own caveat to the Certified Profile percentages. We have used the combined *totals* from the Pop Reports, which combine both rare and generic dates. Our conclusions in this article about the submissions (and resubmissions) of generics will obviously not apply to the more valuable rarer dates.

CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet) both report the national Dealer-to-Dealer wholesale coin market monitoring all possible transactions and offers to buy and sell sight seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current grading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS #008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter
P.O. Box 7939 • Torrance, California 90504

Back to our discussion; I was just getting to the good stuff. "Back in 1988, at a market peak, Type Walkers were priced *much* higher than now, so dealers could afford to take a chance on submitting MS63s, whether for the first time or after "crack-outs" for resubmission. Plus, certification was still so new that dealers did not enjoy the consensus on grading that they share now." I wasn't going to belabor that point, because he had heard often enough that I consider the current consensus on grading to be the greatest direct benefit of the standards imposed by certification. "Combine dealer uncertainty with higher market values and you had a much more accurate *sampling* of survivors being submitted for certification."

Let's look at the current Type Bids for certified Walkers, and the premium over the lower grade. At these Bid levels, it hardly makes sense to submit for certification any Walker that you are now relatively *certain* will grade no higher than an MS65. It also removes the incentive for resubmitting any coin lower than an MS66, and this you would only do in the unlikely event that you had reasonable expectations of receiving an MS67! "Shot-66" may no longer be sufficient reason; the coin needs to be a lot closer to a "lock-67", and that is more unlikely than ever today. Stated frankly, there is a natural pre-selection at work today, to submit only the *highest quality* Type Walkers for certification, due to the costs involved. It just isn't financially logical to crack an MS63 Type Walker and resubmit at a cost of \$15 in the hopes of receiving an MS64 with a Bid premium of only \$6.

In 1988, it made economic sense to send in any Walker with a "shot" at being graded MS63 or better; today, a dealer looking at an MS65 has to think twice about his options. As the declining market narrowed the spreads between adjacent grades on Type coins, it removed much of the profitability from submissions and resubmissions. Unless a certified Type coin sells for sufficiently more than the value raw (or in its current certified grade), plus the cost of certification, plus the time lost on the turn, plus the chance of damage during the "crack-out", chances are that the Walker will remain as it is.

The grading services recognized these new market realities, and introduced lower rates for many coins. Today, both PCGS and NGC offer a \$15 rate for non gold coins valued under \$300, with a longer turn-around time. Steve Mayer, Chief Operations Officer of the Professional Coin Grading Service notes of PCGS's response to changing market levels: "Knowing that there were collectors and dealers who wanted certain lower-priced coins certified, we expanded our service through our \$15 Economy fee, to allow them to do just that." Lower fees have been one of the primary marketing points of the Photo Certified Coin Institute (PCI).

With Walker submissions being pre-selected for MS65s and above, a Walker that the certified population profile will match the *true* population profile. Harvey Stack, leading one of America's

most prestigious numismatic firms, holds the opinion that we have certified *less than one-quarter* of the existing Mint State Walkers. Over many decades as a professional numismatist, he has seen perhaps more than his fair share of the Rolls and Bags of these gorgeous coins. Agreeing that the majority of these survivors grade MS62-MS64, he expects that very few of these coins will be submitted for certification.

Q. David Bowers is firmly of the opinion that ultimately it doesn't matter whether the coins are certified or not; what counts is the coin itself. "In our business, where we cherry pick for quality anyway, we don't mind looking through a dozen slabbed pieces in, say MS-65 grade, in order to find *one* we like...." That is certainly the way that many collectors buy, preferring to examine every coin for those special qualities that each collector individually values. While there remains an active sight-unseen coin trading market, it is equally true that most buyers prefer to examine their coins *before* purchase. This is a matter of using the certified grade as a tool, as an important factor in the purchasing decision.

Of course, Walkers aren't the only series where narrowed spreads have made the submission or resubmission of 'lesser Unc' Type coins unprofitable. The following chart lists some current Type prices for popular series; a quick examination shows which coins cannot be *profitably* certified. And as one dealer was quick to point out to me, don't forget to factor in the spread between the selling price of a raw coin versus certified. While it is impossible to get verifiable data, most reports indicate that substantially fewer coins are being "cracked out" and resubmitted. That can be attributed to both the demonstrated consistency of the certification services and to current market levels.

Bids from the Sept. 2, 1994 Certified Coin Dealer Newsletter - the Bluesheet

	MS61	MS62	MS63	MS64	MS65	MS66	MS67
Buffalo Nickels			\$10	\$13	\$21	\$35	\$340
Mercury Dimes				\$10	\$14	\$23	\$55
Mercury FB				\$11	\$20	\$28	\$150
Walkers	\$22	\$23	\$24	\$33	\$74	\$150	\$680
Morgan Dollars	\$15	\$16	\$23	\$31	\$83	\$212	\$800
Peace Dollars	\$10	\$10	\$16	\$30	\$120	\$775	\$5500

John Albanese, the founder of Numismatic Grading Corp. (NGC), pointed out that the lower populations resulting from 'unprofitable' submissions has been abused in the past by some telemarketers; a low population does *not* necessarily indicate a rare coin. In fact, the NGC Population Report specifically cautions that "Inexpensive coins which are not submitted for certification appear scarce but are not." The NGC Pop Report also notes that "Rarity is only one factor which must be weighed in determining economic value of a numismatic coin." John would remind all our readers that *population* must always be factored against *popularity*. A population of 200 pieces is not necessarily a "high-pop" in a series with several thousand active collectors.

The bottom line is that every professional numismatist needs to take advantage of every tool in the marketplace, and the Population Reports of PCGS and NGC are simply *necessary* tools. Despite their 'imperfections', they are incredibly useful - much like the certification services whose products they tally. For more information on pop reports, contact PCGS at 714-757-7600 and NGC at 201-984-6222.

Barber Quarters: A Real Challenge in High Grade Part I

by David Lawrence

This is the second article in my series on Barber coinage. The May 1994 and June 1994 *CDN Monthly Supplements* contained my article analyzing the Barber Halves in high grade.

Completing a set of Barber Quarters in Mint State is quite a challenge. Besides finding the 1901-S (which is truly rare and virtually impossible below MS64) and 1896-S, there are other dates like the 1897-S, 1898-O, 1898-S and 1903-O that are much tougher than most collectors realize. To provide a framework for the discussion of each issue, I have again created a PRICE INDEX (P.I.) chart as a means of demonstrating relative values. The two Price Indexes for each issue were created as follows: the MS63 P.I. is the product of the *CDN Monthly Supplement* MS63 Bid level times the total certified population of the date

(PCGS and NGC combined) in Mint State, divided by 1,000. The Gem P.I. is the *CDN Monthly Supplement* MS65 Bid level times the total population of coins certified by the two services in MS65 and higher, divided by 1,000. The coins with the lowest P.I. are the best value. The indexes are *relative*, meaning MS63 P.I.s can only be compared with other MS63 P.I.s (likewise, MS65 P.I.s can only be compared with other MS65 P.I.s). Issues with an MS63 P.I. below 40 are undervalued in Mint State in general. Those with a Gem P.I. below 30 are undervalued in MS65 grade. All values and Population Report data are taken from March 1994 publications.

DATE ANALYSIS

1892-P, O and S: First year of issue and generally well-struck and saved. The 1892-P makes a great Type coin, and with a certified population over 1000 coins, it is *available*. The 1892-O provides a good example of a New Orleans coin. With 293 coins certified, it ranks a high 67th (of 74) in certified population. Its Price Indexes of 88 (MS63 P.I.) and 56 (Gem P.I.) are on the high side, but much better than those of the '92-P (see Table). The '92-S is low mintage (964,000) and scarce, and has strong collector demand in circulated grades. With an MS63 P.I. = 39 and a Gem P.I. = 42, it's undervalued in Mint State. All three issues come in two Types, a result of an early hub change. Type I is scarcer than Type II for the P & O, but is the other way for the S-mint.

1893-P, O and S: These were also saved to some extent, being the second year of issue. The "P" comes nice and is available (Pop = 186), but undervalued in Gem condition (Gem P.I. = 25). The "O" is a little scarcer, but still pretty much common; it, too, is undervalued in Gem condition. The 1893-S is the first of the great coins of the set, with strong collector demand in all grades; only 47 certified in all Mint State grades combined (ranks 18th), and tied with the 1898-O and 1903-O as the scarcest coin in the set in MS65 and above (only 4 coins)! In MS65, it is currently bid only 5% below its maximum 1989 level; at that time, common dates were bid at \$5,000 ~ they are just \$1,100 now! Buy this coin in any grade at anything close to current levels. It should command a strong premium, but unlike the scarce dates of more popular series (Walkers and Morgans, for example), Barbers can sometimes be bought "right".

1894-P, O and S: A good Barber year for all mints. The '94-P is a "sleeper" in EF and AU and undervalued in MS65 (Gem P.I. = 24, ranking it 9th). The '94-O is surprisingly scarce in Mint State with just 64 coins certified and an MS63 P.I. of 37. One of the dies struck a repunched mint mark (RPM) and a few of these are available in certified holders at no additional premium. If varieties ever catch on in Barbers, they will be worth quite a bit more. The '94-S is slightly more common than the "O", but certainly still a "better-date." It comes with bright luster and sometimes proof-like; like other S-mint coins of the era, planchet striations may be present. I would buy any of the 1894 issues at today's levels, even the '94-P.

1895-P, O and S: The '95-P is similar to the '94-P in just about all respects. In circulated grades, it's a "better-date", especially in AU; in MS65, it is quite undervalued (Gem P.I. only

Barber Quarters Issue	Total MS Pop.	Total Pop. Rank	MS65 & Up Pop.	MS65 & Up Rank	MS63 Price Index	Gem Price Index
1892	1038	73	175	73	239	192

1895-S	56	24	5	4T	38	19
1896	145	53	28	57	44	36
1896-O	29	5	8	11T	35	64
1896-S	27	3T	6	6T	130	72
1897	159	55	22	47T	37	24
1897-O	34	9T	12	22T	41	37
1897-S	33	8	7	8T	50	36
1898	197	62	38	61T	45	42
1898-O	27	3T	4	1T	27	29
1898-S	24	1	10	19T	20	44
1899	225	63	25	51T	52	28
1899-O	69	35	7	8T	40	30
1899-S	34	9T	20	43	27	56
1900	178	59	27	53T	41	30
1900-O	61	29	13	27T	37	40
1900-S	44	15T	9	13T	29	44
1901	141	52	12	22T	32	19
1901-O	31	7	9	13T	43	44
1901-S	25	2	9	13T	288	288

For current levels, coins with an MS63 P.I. below 40 are undervalued; a Gem P.I. below 30 indicates Gem coins which are undervalued. T = Tied for rank.

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified) but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter

P.O. Box 7939 • Torrance, California 90504

23). The '95-O is scarcer than its '94 counterpart in most grades, and is undervalued in Mint State (MS63 P.I. = 36). This, and the other early New Orleans issues, don't suffer the strike problems typical of the last few years at the Mint (more about this later). However, sharp strikes are definitely rare. The '95-S is very tough in mid-circulated grades, sometimes available in AU, but as scarce as the "O" in Mint State. It is undervalued in all Mint State grades, especially MS65 where the Gem P.I. is only 19 (tied for 2nd lowest). Like most S-mint Barber quarters, the '95-S comes well-struck and sometimes P/L.

1896-P, O and S: Now we are starting to get to the mid-years of the series, where the P-mints are common and the "O" and "S" are very scarce. The '96-P is still a slightly "better-date", but more common than the '94-P and '95-P. The '96-O is very scarce in Mint State, ranking 5th in the series with just 29 coins certified. The difference between it and some of the later O-mints is that the '96 was always known to be scarce, whereas dates like the 1902-O and 1903-O weren't thought to be scarce until the Population Reports came out. The '96-S is RARE, especially from AU55 to MS62. This is one of the "three keys" to the set. Like the 1901-S, the Price Indexes are very high. It is a strange twist that this does not mean it is a bad investment; on the contrary, the high price of this date reflects its strong demand. This is a good coin to buy.

1897-P, O and S: The "P" is common, though undervalued in all Mint States, while the "O" and "S" are very scarce. 1897-O is similar to 1896-O, just slightly more available (though scarcer in AU). Expect a typical soft O-mint strike. The 1897-S is one of my favorite dates: just 33 coins certified, 15 of which are in MS64. On everyone's want list from VG+ to MS63. Also, there is one die with the mint mark in the center position (between the R in QUARTER and O in DOLLAR). This coin is very rare; it is also never seen above Good, and I have not seen one in Mint State.

1898-P, O and S: Similar to the 1897 issues, except the Branch Mint coins are even scarcer. The "P" is common, while the "O" and "S" are rare in Mint State. Despite a substantial mintage of almost 2 million, the '98-O is scarce in all grades from VF through Gem Unc. (where it is tied with the '93-S and '03-O for lowest Pop in MS65 and above). This coin is no sleeper to serious collectors, but it's still undervalued in all Mint State grades (P.I. = 27 in MS63 and 29 in Gem), even with a CDN bid of \$7,150 in MS65. The '98-O comes with a soft (but decent) strike. I have owned one MS64 with deep proof-like fields; wish I had kept it! In contrast, the '98-S is abundant in EF and AU grades, because it was saved in the Philippines, but it is the scarcest of all Barber Quarters in Mint State, with a total of just 24 coins certified (some possibly duplicate submissions). It comes nicer than the '98-O and there are more Gems certified, but it is

highly undervalued in Mint State short of Gem condition (MS63 P.I. = 20, ranking first).

1899-P, O and S: The "P" is common, though undervalued in MS65, the "O" is fairly tough and the "S" is very scarce. '99-O is the most common New Orleans issue after 1893 (until 1906). With 69 coins certified, it ranks 35th. However, it is scarce in MS65 and above and has a Gem P.I. of just 30. Like the '98-O, it comes with a soft (but decent) strike. The '99-S is similar to the 1898 and 1900 San Francisco issues, being available in EF and AU, but highly underrated in MS; but S-mint coins come nice, and 29 of the 34 coins certified are MS64 and higher! Undervalued from AU58 to MS64.

1900-P, O and S: This begins the era where the New Orleans coins are poorly struck. The 1900-P is common, but a "better-date" in VG through AU. 1900-S is like the '98-S and 99-S, but a little more common. It comes nice, but is undervalued from MS60 to 64. 1900-O is the most interesting of this year's issues. Though it had a 3-1/2 million mintage, it is scarce in all grades from VG up. There are 61 coins certified — only 0.18% of the mintage — and few are pleasing. Typically, the strike will be soft on the eagle's right claw and on the right corner of the shield on the reverse. On the obverse, the hair over the forehead will lack detail. If you're a collector, don't wait for a coin with great eye appeal ~ you may never find one. Undervalued from EF through MS64.

1901-P, O and S: The '01-P is common, except in Gem condition where only 12 coins have been certified in MS65 and higher. It is highly undervalued in MS65 (Gem P.I. = 19, ranked 2nd). The 1901-O is a well known rarity; if anything, it is slightly overrated. Strike is soft, but better than some other O-mint issues. It currently ranks 7th in certified population (31 coins). The 1901-S, of course, deserves more space than this article can give it. Total Pop = 25 coins, some of which undoubtedly represent the same coin. No MS60 or MS61 coins have been certified, and only two MS62s. The coin is just as rare in AU. I have only seen two since 1979, and one was polished! I'm sure there are one or two others, but that may be it. So, a serious collector must either find an EF (which aren't exactly plentiful) or go to an MS63 or higher. In addition, not all the Mint State certified coins are nice. This issue is definitely undervalued from full rim Good through MS64. Because the Pop Reports show 3 MS65 and 6 MS66 and higher (which may have duplicates), some people think this date is overrated. But this is only at the high end of the spectrum. If you are a collector, don't wait for the price to come down. I wouldn't bet on it.

(To be continued)

ICTA's ETP Seeks IRA Through D-LA & R-DE's S.2301

What? *What?* Is this numismatics, or are we destined to the brave new world of abbr., government acronyms and politico-speak? Wasn't there a time when dealers hadn't heard of the FTC, and didn't know their local IRS agent on a first-name basis? Wasn't there a time when investors bought coins to avoid "Imperial entanglements"? When a vacation in Long Beach didn't mean a visit from the State Board of Equalization? When a press release didn't sound like an ad in the Personal classified? Welcome to numismatics in the 1990s, and ICTA's latest important, no, *critical* project. The plain truth is that the coin-business is now bound up with the government-business, more than ever before, and if coin dealers wish to succeed, they need to have an effective organization to act as their guide in the always perplexing, and sometimes antagonistic, halls of government.

The Equitable Taxation Project (ETP) is a coalition led by the Industry Council for Tangible Assets (ICTA), seeking to expand the list of items acceptable for placement into individually-directed retirement accounts (IRAs, Keogh Plans, 401Ks & others). Under current law, only U.S. Gold and Silver Eagles are permitted in these accounts. During the boom years in the 1970s, coins were allowed in Retirement accounts, and both dealers and their clients prospered. Effective 1982, Congress excluded collectibles from tax-advantaged retirement plans, but in 1986 U.S. Mint Gold & Silver Eagles were excepted from the definition of "collectible"! The ETP seeks to have selected rare coins and other precious metal products likewise excepted.

Thanks to the ETP, Senator John Breaux (D-LA ~ Democrat from Louisiana) and Senator William Roth (R-DE ~ Republican from Delaware) introduced Senate Bill S.2301 in July, "The Savings and Investment Incentive Act of 1994", and also known as (a.k.a.) "The Super IRA Bill". This revision to current statute would restore Legal Tender coins and precious metals as qualified investments for individual retirement accounts (IRAs) and other individually-directed retirement plans. Representatives J.J. Pickle (D-TX ~ Democrat from Texas) and William Thomas (R-CA ~ Republican from California) introduced

H.R. 5006 (companion legislation to S.2301) in the House of Representatives, **but did not include the ETP provisions!** A new session of Congress will convene next year, so both bills will need to be reintroduced. It is critical to the process to convince the Representatives **to include the ETP provisions next session!**

The "Super IRA Bill" combines investment incentive and flexibility which should help boost our nation's savings and economy. You need to contact your Senators and Representative to explain why they should pass these bills. And you need to encourage your clients to write as well. Remember, if the coin community doesn't act now, the ETP provision could be eliminated from the final bill. In any Bill, many "insignificant" provisions are eliminated in Committee; it is up to you to make sure that your Congressmen know that these provisions are *not* insignificant to you! Contact ETP for copies of their sample letters, and FAX a copy of your letters to Eloise @ 703-847-1742.

The following points are germane to Congressional passage, and should be touched upon in your letters and telephone calls:

Equitable Treatment for Small Investors

Currently, Legal Tender coins and precious metals can be included in defined-contribution pension and profit-sharing plans (both corporate and Keogh), and in other tax-deferred or tax-exempt entities. It seems both logical and equitable that these same assets should also be an investment option for individually-directed plans. Allowing individual investors to select from the same 'menu' of options currently available to larger and corporate investors would 'level the playing field'.

Investment Stability

It is sound practice for retirement portfolios to be diversified, and to include some percentage of counter-inflationary investments. Precious metals and coins tend to experience appreciation during economic cycles that diminish the value of other financial assets. The ETP is currently preparing an economic study comparing "productive vs. non-productive assets" that will quantify this aspect.

Exchanges Promote Liquidity

Bullion and Legal Tender coins currently trade on exchanges that offer access to on-line buy and sell prices. S.2301 limits coins to those "...certified by a recognized

(Continued on the following page)

EXECUTIVE DIRECTOR—Pauline Miladin PUBLISHER—Ron Downing
EDITOR—Dennis R. Baker ANALYST—Robert Korver
CONSULTING EDITOR—Edward Judd GRAPHICS—Shane Downing
CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified) but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter
P.O. Box 7939 • Torrance, California 90504

grading service and traded on a nationally recognized electronic network, or listed by a recognized wholesale reporting service..." While the ETP sought a broader definition of allowable items, this limiting compromise was necessary; Congress is very concerned about values and liquidity. Naturally, sellers would still have access to major auction companies, conventions held across the country, and thousands of individual coin dealers.

No Tax Revenue Impact

Since the ETP's proposal does not change the amount which individuals may invest in individually-directed retirement accounts, the Federal government will not suffer any decline in tax revenues. Senator Breaux has directed the Joint Committee on Taxation (JCT) to prepare a revenue estimate on this issue; initial analysis indicates it to be revenue neutral.

Third Party Trustee Required

The ETP's plan requires that investments in precious metals and Legal Tender coins be held by a third-party trustee as defined by the IRS. These trustees ensure that retirement investments are not "consumed" in any way prior to the time distribution occurs. Legal Tender coins and precious metals are both easily held by a third-party trustee.

In summary, the Super IRA Bill will help your business and your clients. It levels the playing field for the small investor, and may encourage individuals to save even more for retirement. Since it merely expands the types of products approved for IRAs and other individually-directed retirement accounts, it costs the Federal Government nothing! Your members of Congress need to be told how you stand on this Bill, so they can determine their stand! Urge your Congressmen to co-sponsor the appropriate legislation - this is an important part of the process.

Putting it bluntly, every dealer who recognizes the importance of passage of this Act to their business should show their support by contacting Diane Piret @ 504-682-6818 or Eloise Bredder @ 703-847-1740 ~ right after they write and call their Representatives and Senators. Any dealer who *doesn't* understand just how critical this Act is, should make the same call for more detailed information. ETP's efforts also need the support of all dealers through

direct participation — write that check! Writing letters to Congress is probably on a par with trips to the dentist, but to not write now is counter-productive. On a revenue-neutral proposal, Congress will listen to the voters! If business is bad and cutting a check hurts, think about why business is bad. And think about ICTA's stunning success in clarifying the IRS's Regulation 6045 defining "broker" reporting. Enough preaching.

The Future

As important as the Super IRA Bill is, this is but the tip of an iceberg that ETP is tracking. There remains a strong possibility that a Value Added Tax (VAT) will become reality (bills have already been introduced), especially if revenue shortfalls continue. Investment assets have been identified as exempt; if Legal Tender coins and precious metals are not more fully defined as investment assets, you might very well find yourself collecting a Federal sales tax on every sale or trade. Think how popular that will be with your clients.

Contacting Congress

Your two Senators and Representative should be contacted in the following fashion:

<u>SENATE</u>	<u>HOUSE OF REPRESENTATIVES</u>
The Honorable	The Honorable
(First Name, Last Name)	(First Name, Last Name)
United States Senate	U.S. House of Representatives
Washington, DC 20510	Washington, DC 20515
Dear Senator (Name)	Dear Ms. [or Mr.]

With Congress in recess, it would be a good idea to send copies of your letters to their district offices. These addresses can often be found in your local telephone directory, or contact the Reference Desk at your local library. If you want to follow up with a telephone call, the Capitol switchboard number is 202-224-3121.

If you haven't joined ICTA ~ and too many dealers haven't ~ you are riding free on the efforts and dollars of the dealers who care about the future of their business. *Please join.* Contact Diane Piret @ 504-682-6818.

A Special Holder for Your Special Coins

The PCGS Personal Collection Holder

If you own a hundred PCGS graded MS63 St. Gaudens, you probably don't care what the PCGS holder says as long as it says "MS63". But if you have special coins, you may want a holder that indicates something personal about those coins.

Now, with the new PCGS Regency™ Holder, you can choose exactly what you want written on the holder. This new PCGS holder is a premium option for rare coin enthusiasts who want a special way to designate their PCGS coins.

Give a Gift That Keeps On Giving

With the Regency™ Holder, you can give a very special gift to family members, friends, or even to yourself to commemorate special occasions, feelings, or relationships.

Imagine celebrating special events, such as *Weddings, Anniversaries, Birthdays, Graduations or Retirements*, with a gift that adds extra value to those memorable events of your life. Select coins whose dates and values are significant to you and your loved ones. Then, choose a message to make your coins unique.

It's been said that rare coins are "gifts that keeps on giving". Now, with the PCGS customized Regency™ Holder you can give the gift that keeps on giving in the most personal way

Receive the PCGS Guarantee of Grade and Authenticity

The design of the new PCGS Regency™ Holder has been especially created to emphasize the beauty of the coin without sacrificing the tamper-evident features that make the PCGS Guarantee of Grade and Authenticity possible. With the new PCGS Regency™ Holder you receive the same Guarantee of Grade and Authenticity that applies to all PCGS graded coins.

Customize Your Coins Now and Save 20%

Now, for a limited time and for a special introductory price of \$20, you can have your PCGS graded coins personalized with the new PCGS Regency™ Holder and receive a free high quality suede pouch to protect and store each coin. *If your coins have already been graded by PCGS, simply complete the coupon below or call PCGS toll-free at 1-800-447-8848 to have your coins placed in the new PCGS Regency™ Holder. We'll send you all the forms you need to submit your coins directly to PCGS.*

If your coins have not been graded by PCGS, either contact a PCGS authorized dealer to have your coins graded or call PCGS for a list of dealers in your area. Tell the PCGS dealer that you want your coins placed in the new PCGS Regency™ Holder. You must have your coins graded by PCGS before they can be placed in the PCGS Regency™ Holder.

Although the normal price for the PCGS Regency™ Holder is \$25, you can personalize your PCGS graded coins with the new PCGS Regency™ Holder for only \$20 per coin. *But you must act now! This special introductory offer is only good for coins PCGS receives by November 30, 1994.*

**For More Information about the PCGS REGENCY™ HOLDER,
Fill in the Coupon Below or Call 1-800-447-8848**

Barber Quarters: A Real Challenge in High Grade Part II

by David Lawrence

This is a continuation of my article which started in the October *CDN Monthly Supplement*. In Mint State, the second half of the Barber Quarter series has some true rarities, and, surprisingly, the 1913-S is *not* the scarcest. Based on PCGS and NGC Population reports, it is the 1911-D which is the toughest issue in this part of the set, with the 1908-S and a few New Orleans issues close behind. As before, I have developed a Price Index for Mint State coins in general — the **MS63 P.I.** — and one for MS65 and better coins — the **Gem P.I.** The MS63 P.I. is the product of the *CDN Monthly Supplement* MS63 Bid level times the total Mint State certified Population of the date (PCGS & NGC combined), divided by 1,000. The **Gem P.I.** is the *CDN Monthly Supplement* MS65 Bid level times the total Population of coins certified by the two services in MS65 and above, divided by 1,000. The coins with the lowest P.I. are the best value. The indexes are relative, meaning MS63 P.I.s can only be compared with other MS63 P.I. values; likewise for the Gem P.I. levels. Issues with an MS63 P.I. below 40 are undervalued in Mint State in general. Those with Gem P.I. below 30 are undervalued in MS65 grade. All values and Population report data are taken from March 1994 publications.

DATE ANALYSIS

1902-P, O and S: The "P" is common, but both Branch Mint issues are scarce, especially the 1902-O; like most New Orleans' issues of the series, it is much tougher to find than its mintage suggests. Only 36 Mint State coins have been certified (ranking 12th), 9 of which are MS65 and above. With an MS63 P.I. of 30 it is undervalued in Mint State, and at current levels I would grab any decent 1902-O that can be found (it comes softly-struck with a satiny luster). The 1902-S comes well-struck with flashy luster, sometimes P/L, and sometimes with planchet striations. The 63 coins certified rank it 30th in Mint State, but it is fairly low mintage and enjoys strong collector demand in all grades.

1903-P, O and S: All three are good dates. The "P" is underrated from AU to MS64 and extremely scarce in Gem condition, with only 6 coins graded MS65 and above. Its Gem P.I. of just 13 is the lowest of the series. This issue comes well-struck and often proof-like. The "O" is one of the scarcest Barber Quarters in Mint State, with only 34 certified in all grades (it ranks 9th overall). Only 4 coins have been certified in MS65 and above, ranking it first (tied). Both Price Indexes are very low — it is tied with the 1898-S as the best value in general in Mint State — and is similarly a good buy in Gem condition. Like most "O" mints, the strike will usually be soft. In contrast, the 1903-S is well-struck and usually flashy. This is a good collector date with strong demand from VG through MS63, but some nice ones have survived— 27 MS64s and 21 Gems have been certified. I like this date at current levels at least through MS64.

1904-P and O: The Philadelphia issue is fairly scarce, despite a high mintage, and is undervalued in all Mint State grades, including Gem condition (MS63 P.I. = 30, Gem P.I. = 29). The 1904-O is a well known rarity. This issue often comes with a depression on the face (a result of puffiness on the die?) and with a soft strike. I don't think I've ever seen a well-struck, perfect example. At current levels this date is no bargain in MS63 (MS63 P.I. = 51), but demand for Barbers being what it is, I wouldn't let a nice piece get away in any grade.

1905-P, O and S: Another interesting year. The "P" is harder to find than would be expected. I don't know where the 110 certified coins are,

but I have several Want Lists for decent specimens. The price indexes are only 25 (MS63) and 22 (Gem). The 1905-O & S are both very scarce, with just 44 and 48 certified Mint State coins (ranking 15th and 20th respectively). Today, the 1905-O is every collector's favorite undervalued date. Demand for specimens grading Fine through MS62 just can't be met and Mint State specimens with nice eye-appeal are rare on the bourse floor. The "S" is similar, but comes with a better strike and is slightly more available. Both Branch Mint issues are undervalued in Mint State in general; I would also buy Gems at current levels.

Barber Quarters Issue	Total MS Pop.	Total Pop. Rank	MS65 & Up Pop.	MS65 & Up Rank	MS63 Price Index	Gem Price Index
1902	175	56	40	64	40	44

EXECUTIVE DIRECTOR—Pauline Miladin PUBLISHER—Ron Downing
EDITOR—Dennis R. Baker ANALYST—Robert Korver
CONSULTING EDITOR—Edward Judd GRAPHICS—Shane Downing
CIRCULATION & ADVERTISING—Betty Morris

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The CERTIFIED COIN DEALER Newsletter provides Bids for certified coins only.

1906-P, D and O: An interesting year, but as the series advances, we encounter dates with greater availability. Collectors find the 1906-P a tough date in Fine through MS61, but it is available in MS62 and above. The "D" is scarcer, but not rare; as the first year of the Denver Mint issues, it was saved. Bid levels are low, however, and the Denver coin is currently undervalued in all Mint State grades. Only 12 coins are certified MS65 and higher. The New Orleans' issue has strong collector demand in circulated grades, but 131 were certified in Mint State. It is not undervalued compared with other dates, but I doubt that nice specimens will stay around at current levels. In MS65, they are priced just a little over common and several of my customers find this "incredibly cheap." This issue comes with nice, sometimes flashy luster, but a weak strike.

1907-P, D, O and S: Of these, the "P" is common, the "O" is better but available, and the "D" and "S" are scarce. The "P" is the most common middle-year date, with 269 certified. Its Population is spread through the Mint State grades, and there are 39 graded MS65 and higher. The New Orleans issue has a fairly substantial Population of 99 coins, but they come with soft and weird strikes ("mumps," depressions, planchet flaws, etc.). Finding a well-struck, problem-free coin will be very difficult. At current levels it is undervalued in all Mint State grades, especially in Gem condition (Gem P.I. = 28). The Denver issue, like its Dime counterpart, is unexpectedly scarce; 64 have been certified (ranking 31st), 11 of which are Gems (ranking 21st). It is undervalued in Mint State through MS64. The 1907-S has only 47 certified coins (rank = 18th) and MS63 P.I. = 32. This is a low mintage issue with strong collector demand in Fine and above. It comes well-struck, with flashy luster, and sometimes P/L. Eye-appealing coins should be purchased at anywhere near today's levels.

1908-P, D, O and S: Of these, only the "S" is of interest, though the "P" is a better date in circulated grades and the "D" has only a modest certified Population (116 coins, ranking 45th). The 1908-S, however, is one of the great dates of the series. Mintage is low (784,000) and it was not particularly saved. Only 36 coins have been certified (ranks 12th), with 9 Gems. It is definitely undervalued from MS60 - 64 (MS63 P.I. = 36) and I would not even let a Gem get away, even though the Gem P.I. = 54. Keep in mind that there are 25 of the rare 1901-S certified, so there are only 11 more of the 1908-S issue available; yet in MS63, it is just 1/12th the price.

1909-P, D, O and S: The '09-P is the 5th most common date in Mint State with 355 certified. The '09-D isn't of much more interest (Pop. = 137), though it sometimes carries a modest premium. However, the '09-O is rare (Pop. = 43, ranks 14th; 7 certified in MS65 and higher) and the '09-S is scarce (Pop. = 60, ranks 26th). The 1909-O comes with a shallow strike, especially on the central obverse. In circulated coins, much of the laurel wreath detail is gone, even in VF grade coins. Luster can be nice, though not flashy, and it doesn't seem to be plagued by planchet flaws and depressions like the '04-O and '07-O. In AU, this coin is virtually impossible, so it is fortunate that a few Mint State coins are available for collectors. Like the '08-S, nice 1909-O specimens should be bought, even though P.I.s are in the 40's. The '09-S, like other S-mints, comes well-struck and flashy (sometimes with planchet striations). Generally, this date is hard to find, but a few nice examples were in the Reed Hawn Sale (Stack's). This date is undervalued from MS60 - 64 (MS63 P.I. = 34) and usually on several Want Lists.

1910-P and D: An interesting year. The 1910-P is definitely a better date, though you wouldn't think so with a certified Population of 121 coins (ranks 47th). It is highly undervalued in Mint State in general (MS63 P.I. = 24). The 1910-D is a "sleeper." The Pop. is just 60 (ranks 26th) and it comes with shallow details. Lustrous, white coins of any grade are very scarce and should be snatched up. Strong collector demand in EF and AU.

The Coin Dealer Newsletter (USPS #008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. Second-Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee.

Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$54.00 for six months, \$98.00 for one year and \$162.00 for two years.

Address all subscription remittances to:

the COIN DEALER Newsletter
P.O. Box 7939 • Torrance, California 90504

1911-P, D and S: The '11-P is common, though softly-struck (as is typical of all late dates in this series). The "D" and "S" are both low mintage and desirable. However, a couple of rolls of the '11-S must have been saved because they came out early in the certification years, and it has always been "high Pop." (105 coins certified). This issue comes nice (56 are MS65 or better!), but it enjoys very strong collector demand in MS63 and below. The '11-D has remained scarce in all grades. Only 30 have been certified (just 5 more than the 1901-S) and it ranks 6th. Five of these are MS65 and better, ranking the date 4th. Both P.I.s are low (28 and 21 respectively). When I first wrote my book in 1989, this date was priced little more than common in EF and AU. Not anymore; the word is out.

1912-P and S: (How many of you would guess there is no "D" this year)? The '12-P is common, ranking 69th in Mint State Pop. The '12-S is low mintage and highly prized. Pop is just 50 coins (21st) with 16 Gems. It is undervalued in Mint State in general and has additional strong demand from date collectors. The date is usually lustrous and as well-struck as this late part of the series tends to be; when available, they go quickly.

1913-P, D and S: The "P" has a mintage of just 484,000, but in the past could sometimes be picked up as a common date (I once did). The certified Pop. is a substantial 67 coins. For awhile, it was overpriced in Mint State and the MS63 P.I. is still high (60), but levels have been sliding a bit lately. The '13-D is a little better date and undervalued in all Mint State grades (P.I. = 34 and 23 respectively). It is the "S" which draws the most attention. A mintage of only 40,000 makes this a rare coin. However, enough were saved (Pop. = 46 to make it available to serious collectors, though it will always be pricey — the P.I.s are a whopping 207 in MS63 and 136 in Gem. But don't stay on the sidelines waiting for the price to come down; this date has good old-fashioned demand! For collectors, the choice is between low grade pieces from AG to VG+, or an Unc.; EF and AU coins almost don't exist.

1914-P, D and S: The "P" and "D" are common with high Populations (453 and 236, respectively). The '14-S is very low mintage and scarce. However, being late in the series, it was somewhat saved. There are 59 certified coins (ranks 25th), with 16 Gems (ranks 33rd). Like the other scarce dates, levels are additionally driven by collector demand and the price indexes are not low (56 and 43, respectively). Nice specimens should be bought. EF and AU specimens are very tough, and demand from set collectors for these and low Mint State grades will always exceed supply. One of the dies had a shallow, flat mint mark; though the flat "S" looks strange, the coins are genuine.

1915-P, D and S: The "P" and "D" are among the most common dates in the series — 350 and 425 certified, respectively. The 1915-S is low mintage, but was saved; the Pop. of 100 (ranks 39th) is higher than expected. This date comes with great luster and flash but the coins are often "baggy." The low P.I.s show this issue is worth buying, but I would be picky.

1916-P and D: Last year of issue and saved. The Denver coin is low mintage, especially for a P-mint, and is fairly scarce in mid-circulated grades. The '16-D is the bane of the series. Whenever I bid on Barber Quarters on the computer networks, I fear I'll end up with this one. With 1214 certified, it has the highest Pop. and the P.I.s are second only to the 1901-S (which is costly for a different reason). Obviously, the worst buy in the set. Interestingly, there are several repunched mint marks and other identifiable dies and this issue could be a study in itself.

Entire Mailing For You!
Call for details.

Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

1995 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list averaging 5,000+ current names and addresses. And **current** is a promise taken seriously - the data base is updated **daily**. All for only \$325 - well below the mailing industry standard of \$75/thousand.

To make this offer even more attractive, labels are available in both First Class - Zip Code order or Presorted for Third Class - Basic Bulk Rate mailings (you can save more than \$425 over First Class postage rates!). Need just one state or region? Contact us for details!

CALL TODAY FOR INFORMATION — 310-515-7369
